

Lenovo ThinkSystem SR655 V3 Server Product Guide

The Lenovo ThinkSystem SR655 V3 is a 1-socket 2U server that features the 5th Gen AMD EPYC 9005 "Turin" family of processors. With up to 160 cores per processor and support for the new PCIe 5.0 standard for I/O, the SR655 V3 offers the ultimate in one-socket server performance in a 2U form factor. The server is ideal for dense workloads that can take advantage of GPU processing and high-performance NVMe drives.

Suggested uses: AI Inference, VDI, OLTP, Analytics, software-defined storage

[Full 3D Tour](#)

Did you know?

The SR655 V3 server is a very configuration-rich offering, supporting 31 different drive bay configurations in the front, middle and rear of the server and 6 different slot configurations at the rear of the server. This level of flexibility ensures that you can configure the server exactly the way your workload requires.

Key features

Combining performance and flexibility, the SR655 V3 server is a great choice for enterprises of all sizes. The server offers a broad selection of drive and slot configurations and offers high performance features that industries such as finance, healthcare and telco need. Outstanding reliability, availability, and serviceability (RAS) and high-efficiency design can improve your business environment and can help save operational costs.

Scalability and performance

The following features boost performance, improve scalability and reduce costs:

- Supports one 5th Gen AMD EPYC 9005 processor
 - Up to 160 cores and 320 threads
 - Core speed of up to 4.0 GHz
 - TDP rating of up to 400 W
- Supports one fourth-generation AMD EPYC 9004 processor
 - Up to 128 cores and 256 threads
 - Core speed of up to 4.1 GHz
 - TDP rating of up to 360 W
- Support for DDR5 memory DIMMs to maximize the performance of the memory subsystem:
 - 12 DDR5 memory DIMMs
 - 12 memory channels (1 DIMM per channel)
 - DIMM speeds up to 6000 MHz
 - Using 256GB 3DS RDIMMs, the server supports up to 3TB of system memory
- Supports up to eight single-width GPUs or three double-wide GPUs, for substantial processing power in a 2U system.
- The server is Compute Express Link (CXL) v1.1 Ready. With CXL 1.1 for next-generation workloads, you can reduce compute latency in the data center and lower TCO. CXL is a protocol that runs across the standard PCIe physical layer and can support both standard PCIe devices as well as CXL devices on the same link.
- Supports up to 40x 2.5-inch hot-swap drive bays, by using combinations of front-accessible (up to 24 bays), mid bays (8 bays) and rear-accessible (8 bays).
- Supports 20x 3.5-inch drive bays for lower-cost high-capacity HDD storage. 2.5-inch and 3.5-inch drive bays can be mixed if desired.
- Supports up to 24x NVMe drives without oversubscription of PCIe lanes (1:1 connectivity), or up to 32 NVMe drives with oversubscription. The use of NVMe drives maximizes drive I/O performance, in terms of throughput, bandwidth, and latency.
- Supports up to 20x SATA drives using the onboard SATA controller (no additional adapter needed), enabling lower cost, high capacity storage solution for cold storage workloads.
- Supports high-speed RAID controllers from Lenovo and Broadcom providing 12 Gb SAS connectivity to the drive backplanes. A variety of PCIe 3.0 and PCIe 4.0 RAID adapters are available.
- Supports two externally accessible 7mm hot-swap drives for operating system boot functions or data storage. Optional RAID with the addition of a RAID adapter installed in a slot.
- Supports M.2 drives for convenient operating system boot functions or data storage. Available M.2 adapters support either one M.2 drive or two M.2 drives. Optional RAID with the addition of a RAID adapter installed in a slot.
- Up to 10x total PCIe slots (either 10x rear, or 6x rear + 2x front), plus a slot dedicated to the OCP adapter (rear or front). 2.5-inch drive configurations also support an additional internal bay for a cabled RAID adapter or HBA.
- The server has a dedicated industry-standard OCP 3.0 small form factor (SFF) slot, with a PCIe 4.0 x16 interface, supporting a variety of Ethernet network adapters. Simple-swap mechanism with thumbscrews and pull-tab enables tool-less installation and removal of the adapter. Supports shared BMC network sideband connectivity to enable out-of-band systems management.

- The server offers PCI Express 5.0 (PCIe Gen 5) I/O expansion capabilities that doubles the theoretical maximum bandwidth of PCIe 4.0 (32GT/s in each direction for PCIe 5.0, compared to 16 GT/s with PCIe 4.0). A PCIe 5.0 x16 slot provides 128 GB/s bandwidth, enough to support a 400GbE network connection.

Availability and serviceability

The server provides many features to simplify serviceability and increase system uptime:

- Designed to run 24 hours a day, 7 days a week
- The server uses ECC memory and supports memory RAS features including Single Device Data Correction (SDDC, also known as Chipkill), Patrol/Demand Scrubbing, Bounded Fault, DRAM Address Command Parity with Replay, DRAM Uncorrected ECC Error Retry, On-die ECC, ECC Error Check and Scrub (ECS), and Post Package Repair.
- The server offers hot-swap drives, supporting RAID redundancy for data protection and greater system uptime.
- Available M.2 configuration with RAID support which can enable two SATA or two NVMe M.2 drives to be configured as a redundant pair.
- The server has up to two hot-swap redundant power supplies and up to six hot-swap redundant fans to provide availability for business-critical applications.
- Optional front-accessible slots and drives so that most major components and cables (except power) are located at the front of the server
- The power-source-independent light path diagnostics uses LEDs to lead the technician to failed (or failing) components, which simplifies servicing, speeds up problem resolution, and helps improve system availability.
- Solid-state drives (SSDs) offer more reliability than traditional mechanical HDDs for greater uptime.
- Proactive Platform Alerts (including PFA and SMART alerts): Processors, voltage regulators, memory, internal storage (SAS/SATA HDDs and SSDs, NVMe SSDs, M.2 storage, flash storage adapters), fans, power supplies, RAID controllers, server ambient and subcomponent temperatures. Alerts can be surfaced through the XClarity Controller to managers such as Lenovo XClarity Administrator, VMware vCenter, and Microsoft System Center. These proactive alerts let you take appropriate actions in advance of possible failure, thereby increasing server uptime and application availability.
- The built-in XClarity Controller 2 continuously monitors system parameters, triggers alerts, and performs recovery actions in case of failures to minimize downtime.
- Built-in diagnostics in UEFI, using Lenovo XClarity Provisioning Manager, speed up troubleshooting tasks to reduce service time.
- Lenovo XClarity Provisioning Manager supports diagnostics and can save service data to a USB key drive or remote CIFS share folder for troubleshooting and reduce service time.
- Auto restart in the event of a momentary loss of AC power (based on power policy setting in the XClarity Controller service processor)
- Offers a diagnostics port on the front of the server to allow you to attach an external diagnostics handset for enhanced systems management capabilities.
- Support for the XClarity Administrator Mobile app running on a supported smartphone and connected to the server through the service-enabled USB port, enables additional local systems management functions.
- Three-year or one-year customer-replaceable unit and onsite limited warranty, 9 x 5 next business day. Optional service upgrades are available.

Manageability and security

Systems management features simplify local and remote management:

- The server includes an XClarity Controller 2 (XCC2) to monitor server availability. Optional upgrade to XCC Platinum to provide remote control (keyboard video mouse) functions, support for the mounting of remote media files, FIPS 140-3 security, enhanced NIST 800-193 support, boot capture, and other management and security features.
- Lenovo XClarity Administrator offers comprehensive hardware management tools that help to increase uptime, reduce costs and improve productivity through advanced server management capabilities.

- UEFI-based Lenovo XClarity Provisioning Manager, accessible from F1 during boot, provides system inventory information, graphical UEFI Setup, platform update function, RAID Setup wizard, operating system installation function, and diagnostic functions.
- Support for Lenovo XClarity Energy Manager which captures real-time power and temperature data from the server and provides automated controls to lower energy costs.
- An integrated industry-standard Unified Extensible Firmware Interface (UEFI) enables improved setup, configuration, and updates, and simplifies error handling.
- Support for industry standard management protocols, IPMI 2.0, SNMP 3.0, Redfish REST API, serial console via IPMI
- An integrated hardware Trusted Platform Module (TPM) supporting TPM 2.0 enables advanced cryptographic functionality, such as digital signatures and remote attestation.
- Administrator and power-on passwords help protect from unauthorized access to the server.
- Supports AMD Secure Root-of-Trust, Secure Run and Secure Move features to minimize potential attacks and protect data as the OS is booted, as applications are run and as applications are migrated from server to server.
- Supports Secure Boot to ensure only a digitally signed operating system can be used.
- Industry-standard Advanced Encryption Standard (AES) NI support for faster, stronger encryption.
- Additional physical security features are a chassis intrusion switch and a lockable front bezel.

Energy efficiency

The following energy-efficiency features help save energy, reduce operational costs, and increase energy availability:

- Energy-efficient planar components help lower operational costs.
- High-efficiency power supplies with 80 PLUS Titanium certifications
- Low-voltage 1.1V DDR5 memory offers energy savings compared to 1.2V DDR4 DIMMs, an approximately 20% decrease in power consumption
- Solid-state drives (SSDs) consume as much as 80% less power than traditional spinning 2.5-inch HDDs.
- The server uses hexagonal ventilation holes, which can be grouped more densely than round holes, providing more efficient airflow through the system and thus keeping your system cooler.
- Optional Lenovo XClarity Energy Manager provides advanced data center power notification and analysis to help achieve lower heat output and reduced cooling needs.

Comparing the SR655 V3 to the SR655

The ThinkSystem SR655 V3 improves on the previous generation SR655, as summarized in the following table.

Table 1. Comparing the SR655 V3 to the SR655

Feature	SR655	SR655 V3	Benefits
---------	-------	----------	----------

Feature	SR655	SR655 V3	Benefits
Processor	<ul style="list-style-type: none"> • 1x 2nd or 3rd Gen AMD EPYC processor • Up to 64 cores • TDP ratings up to 280W • 64x PCIe 4.0 lanes per processor 	<ul style="list-style-type: none"> • 1x 4th or 5th Gen AMD EPYC processor • Up to 160 cores • TDP ratings up to 400W • 64x PCIe 5.0 lanes per processor 	<ul style="list-style-type: none"> • Significant increase in cores per processor • Increased performance • Consolidation of more apps on same number of servers, reducing costs • New PCIe 5.0 support means higher performance networking and NVMe storage
Memory	<ul style="list-style-type: none"> • DDR4 memory operating up to 2933 MHz • 8 channels per CPU • 16 DIMMs, 2 DIMMs per channel • Supports RDIMMs and 3DS RDIMMs • Up to 2TB of system memory (16x 128GB) 	<ul style="list-style-type: none"> • DDR5 memory operating up to 6000 MHz • 12 channels per CPU • 12 DIMMs, 1 DIMM per channel • Supports RDIMMs, 3DS RDIMMs and 9x4 RDIMMs • Up to 3TB of system memory (12x 256GB) 	<ul style="list-style-type: none"> • New DDR5 memory offers significant performance improvements over DDR4 • More memory channels means greater memory bandwidth • Support for lower-cost 9x4 DIMMs
Internal storage	<ul style="list-style-type: none"> • 20x 3.5" SAS/SATA/NVMe (12 front, 4 mid, 4 rear) • Up to 32x 2.5" SAS/SATA/NVMe (24 front + 8 mid, or 24 front + 4 rear) • Up to 4x 3.5" or 8x 2.5" mid-chassis drive bays • Up to 4x 3.5" or 4x 2.5" rear drive bays • 2x Internal M.2 with optional RAID • 16x onboard NVMe ports 	<ul style="list-style-type: none"> • 20x 3.5" SAS/SATA/NVMe (12 front, 4 mid, 4 rear) • 40x 2.5" SAS/SATA/NVMe (24 front, 8 mid, 8 rear) • Up to 4x 3.5" or 8x 2.5" mid-chassis drive bays • Up to 4x 3.5" or 8x 2.5" rear drive bays • 2x Internal M.2 with optional RAID 1 (RAID support via a separate adapter) • 12x onboard NVMe ports • 2x rear 7mm hot swap SAS/SATA/NVMe (RAID support via a separate adapter) 	<ul style="list-style-type: none"> • Flexible storage offerings • Up to 32x NVMe drives for high-performance storage • 7mm hot swap drives as boot drives
RAID	<ul style="list-style-type: none"> • 8-port and 16-port RAID adapters with up to 8GB flash • Support for Lenovo and Broadcom adapters • Support for PCIe or Internal cabled (CFF) form factor adapters • Storage HBAs available • PCIe 3.0 and PCIe 4.0 adapter choices 	<ul style="list-style-type: none"> • 8-port and 16-port RAID adapters with up to 8GB flash • Support for Lenovo and Broadcom adapters • Support for PCIe or Internal cabled (CFF) form factor adapters • Support for NVMe drives connected to 940 RAID adapters (Tri-Mode) • Storage HBAs available • PCIe 3.0 and PCIe 4.0 adapter choices with support for Gen 5 adapters when available 	<ul style="list-style-type: none"> • Consistent RAID/HBA support • Flexible config solution • PCIe Gen 5 allows for greater storage performance

Feature	SR655	SR655 V3	Benefits
Networking	<ul style="list-style-type: none"> ● OCP 3.0 slot with PCIe Gen4 x16 interface (rear of server) ● Additional PCIe adapters supported up to PCIe Gen4 ● 1GbE dedicated Management port 	<ul style="list-style-type: none"> ● OCP 3.0 slot with PCIe Gen4 x16 interface (rear or front of server) ● Additional PCIe adapters supported up to PCIe Gen5 ● 1GbE dedicated Management port 	<ul style="list-style-type: none"> ● Improved performance with PCIe Gen 5 ● Optional front-accessible OCP slot
PCIe	<ul style="list-style-type: none"> ● Supports PCIe 4.0 ● Up to 8x PCIe slots (all full-height slots) ● Supports a RAID/HBA in CFF form factor (does not occupy a PCIe slot) ● Additional OCP 3.0 slot 	<ul style="list-style-type: none"> ● Supports PCIe 5.0 ● Up to 10x PCIe slots (6x full height, 4x low-profile) or 8x PCIe slots (all full-height slots) ● Up to 9x slots can be PCIe 5.0 ● Supports a RAID/HBA in CFF form factor (does not occupy a PCIe slot) ● Additional OCP 3.0 slot ● Support for 3x front-accessible slots (2x FH PCIe + 1x OCP) with 16 drive bays 	<ul style="list-style-type: none"> ● PCIe Gen 5 allows for greater I/O performance ● Flexible PCIe offerings ● Front-accessible slots available ● More PCIe connections for greater PCIe/NVMe support
Management and security	<ul style="list-style-type: none"> ● Limited XClarity support with ASPEED 2500 BMC ● Tamper Switch security solution (intrusion switch) 	<ul style="list-style-type: none"> ● Integrated XClarity Controller 2 ● Support for full XClarity toolset including XClarity Administrator ● Platform Firmware Resiliency (PFR) hardware Root of Trust (RoT) ● Tamper Switch security solution (intrusion switch) 	<ul style="list-style-type: none"> ● New XCC2 offers improved management capabilities ● Support for full XClarity toolset ● Silicon-level security solution
Power	<ul style="list-style-type: none"> ● 500W, 750W, 1100W AC Platinum/Titanium Hot Plug PSU ● 1100W -48VDC Platinum general support ● 240V HVDC support for PRC customers ● Active-Standby mode 	<ul style="list-style-type: none"> ● 750W, 1100W, 1800W AC Platinum/Titanium Hot Plug PSU ● 1100W -48VDC Platinum general support ● 240V HVDC support for PRC customers ● Active-Standby mode 	<ul style="list-style-type: none"> ● Multiple PSU offerings to suit the configuration selected ● New ErP Lot 9-compliant offerings ● Support for Telco customers with -48V requirements

Components and connectors

The following figure shows the front of the server.

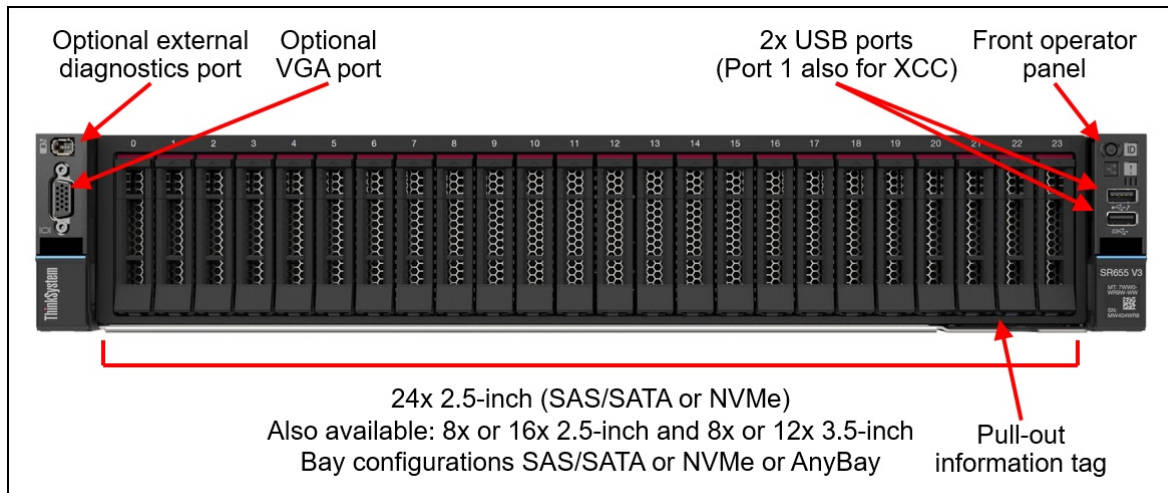

Figure 2. Front view of the Lenovo ThinkSystem SR655 V3

The following figure shows the components visible from the rear of the server. The figure shows one configuration, with eight PCIe slots, however there are additional rear configurations which include 3.5-inch drive bays, 2.5-inch drive bays, or 7mm drive bays.

Figure 3. Rear view of the Lenovo ThinkSystem SR655 V3 (configuration with eight PCIe slots)

The following figure shows the locations of key components inside the server.

Figure 4. Internal view of the Lenovo ThinkSystem SR655 V3

System architecture

The following figure shows the architectural block diagram of the SR655 V3, showing the major components and their connections.

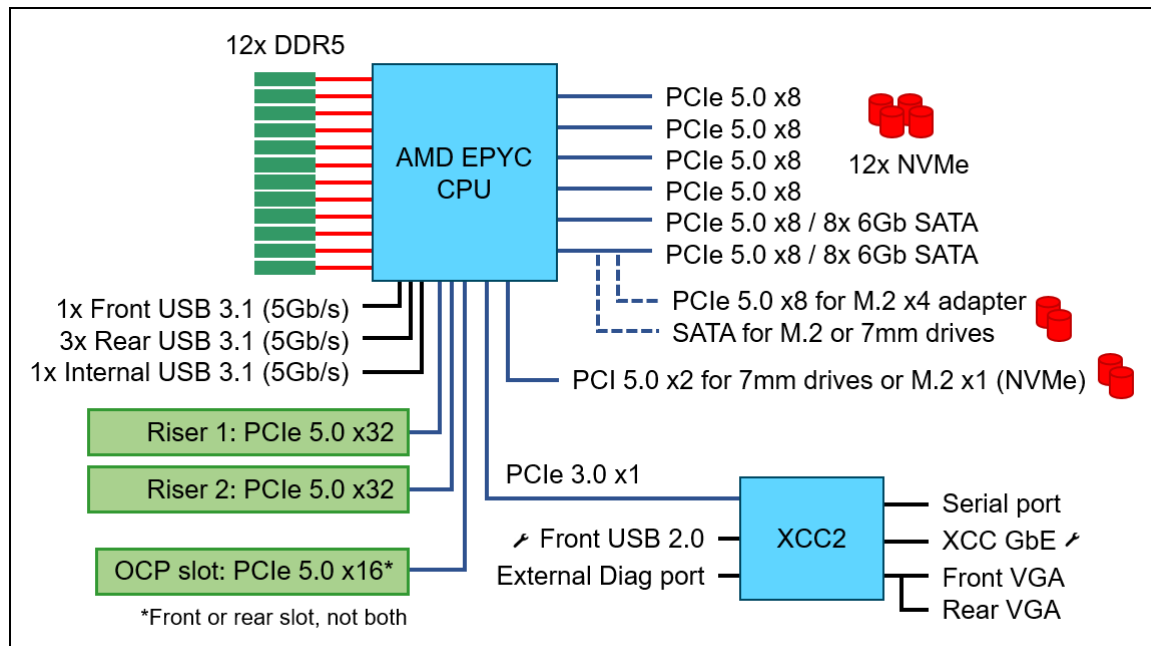

Figure 5. SR655 V3 system architectural block diagram

Standard specifications

The following table lists the standard specifications.

Table 2. Standard specifications

Components	Specification
Machine types	7D9F - 1 year warranty 7D9E - 3 year warranty
Form factor	2U rack.
Processor	One AMD EPYC processor, either 5th Gen 9005 ("Turin") or 4th Gen 9004 ("Genoa"). Supported processors up to 160 cores, core speeds of up to 4.1 GHz, and TDP ratings of up to 400W. Supports PCIe 5.0 for high performance I/O.
Chipset	Not applicable (platform controller hub functions are integrated into the processor)
Memory	12 DIMM slots. The processor has 12 memory channels, with 1 DIMM per channel (DPC). Lenovo TruDDR5 RDIMMs, 3DS RDIMMs, and 9x4 RDIMMs are supported, up to 6000 MHz
Memory maximum	Up to 3TB with 12x 256GB 3DS RDIMMs
Persistent memory	Not supported.
Memory protection	ECC, SDDC, Patrol/Demand Scrubbing, Bounded Fault, DRAM Address Command Parity with Replay, DRAM Uncorrected ECC Error Retry, On-die ECC, ECC Error Check and Scrub (ECS), Post Package Repair

Components	Specification
Disk drive bays	<p>Up to 20x 3.5-inch or 40x 2.5-inch hot-swap drive bays:</p> <ul style="list-style-type: none"> ● Front bays can be 3.5-inch (8 or 12 bays) or 2.5-inch (8, 16 or 24 bays) ● Middle bays can be 3.5-inch (4 bays) or 2.5-inch (8 bays) ● Rear bays can be 3.5-inch (2 or 4 bays) or 2.5-inch (4 or 8 bays) ● Combinations of SAS/SATA, NVMe, or AnyBay (supporting SAS, SATA or NVMe) are available <p>The server also supports these drives for OS boot or drive storage:</p> <ul style="list-style-type: none"> ● Two 7mm drives at the rear of the server (optional RAID) ● Internal M.2 module supporting up to two M.2 drives (optional RAID) <p>See Storage configurations for details.</p>
Maximum internal storage	<ul style="list-style-type: none"> ● 2.5-inch drives: <ul style="list-style-type: none"> ○ 1228.8TB using 40x 30.72TB 2.5-inch SAS/SATA SSDs ○ 1966.08TB using 32x 61.44TB 2.5-inch NVMe SSDs ○ 96TB using 40x 2.4TB 2.5-inch HDDs ○ 7.68TB using 2x 3.84TB 7mm SSDs ● 3.5-inch drives: <ul style="list-style-type: none"> ○ 480TB using 20x 24TB 3.5-inch HDDs ○ 307.2TB using 20x 15.36TB 3.5-inch SAS/SATA SSDs ○ 153.6TB using 12x 12.8TB 3.5-inch NVMe SSDs
Storage controller	<ul style="list-style-type: none"> ● Up to 16x Onboard SATA ports (non-RAID) ● Up to 12x Onboard NVMe ports (non-RAID) ● NVMe Retimer Adapter (PCIe 4.0 or PCIe 5.0) ● NVMe Switch Adapter (PCIe 4.0) ● 12 Gb SAS/SATA RAID adapters <ul style="list-style-type: none"> ○ 8, 16 or 32 ports ○ Up to 8GB flash-backed cache ○ PCIe 4.0 or PCIe 3.0 host interface ● 12 Gb SAS/SATA HBA (non-RAID) <ul style="list-style-type: none"> ○ 8-port and 16-port ○ PCIe 4.0 or PCIe 3.0 host interface
Optical drive bays	No internal optical drive
Tape drive bays	No internal backup drive
Network interfaces	<p>Dedicated OCP 3.0 SFF slot with PCIe 4.0 x16 host interface, either at the rear of the server (rear-accessible) or the front of the server (front-accessible). Supports a variety of 2-port and 4-port adapters with 1GbE, 10GbE and 25GbE network connectivity. One port can optionally be shared with the XClarity Controller 2 (XCC2) management processor for Wake-on-LAN and NC-SI support. Additional PCIe network adapters supported in PCIe slots.</p>

Components	Specification
PCI Expansion slots	<p>Up to 10x total PCIe slots (either 10x rear, or 6x rear + 2x front), plus a slot dedicated to the OCP adapter (rear or front). 2.5-inch drive configurations also support an additional internal bay for a cabled RAID adapter or HBA.</p> <p><i>Rear:</i> Up to 10x PCIe slots, plus a slot dedicated to the OCP adapter. Slots are either PCIe 5.0 or 4.0 depending on riser selection and rear drive bay selection. OCP slot is PCIe 4.0.</p> <p>Slots are configured using three riser cards. Riser 1 (slots 1-3) and Riser 2 (slots 4-6) are installed in slots in the system board, Riser 3 (slots 7-8) and Riser 4 (9-10) are cabled to ports on the system board. A variety of riser cards are available. See the I/O expansion for details.</p> <p><i>Front:</i> The server supports slots at the front of the server (configurations with up to 16 drive bays), as an alternative to rear slots in Riser 3 (and Riser 4). Front slots are 2x PCIe x16 full-height half-length slots plus 1x OCP slot. OCP slot is PCIe 4.0.</p> <p><i>Internal:</i> For 2.5-inch front drive configurations, the server supports the installation of a RAID adapter or HBA in a dedicated area that does not consume any of the PCIe slots.</p>
Ports	<p>Front: 1x USB 3.2 G1 (5 Gb/s) port, 1x USB 2.0 port (also for XCC local management), External diagnostics port, optional VGA port.</p> <p>Rear: 3x USB 3.2 G1 (5 Gb/s) ports, 1x VGA video port, 1x RJ-45 1GbE systems management port for XCC remote management. Optional 2nd XCC remote management port (installs in OCP slot). Optional DB-9 COM serial port (installs in slot 3).</p> <p>Internal: 1x USB 3.2 G1 (5 Gb/s) connector for operating system or license key purposes.</p>
Cooling	Up to 6x N+1 redundant hot swap 60 mm fans, configuration dependent. One fan integrated in each power supply. For customers with water infrastructure in their data center, the SR655 V3 also offers Lenovo Neptune Core open-loop water cooling for efficient heat removal.
Power supply	Up to two hot-swap redundant AC power supplies, 80 PLUS Platinum or 80 PLUS Titanium certification. 750 W, 1100 W, 1800 W, 2400 W, and 2600 W AC, supporting 220 V AC. 750 W and 1100 W options also support 110V input supply. In China only, all power supply options support 240 V DC. Also available is a 1100W power supply with a -48V DC input.
Video	Embedded video graphics with 16 MB memory with 2D hardware accelerator, integrated into the XClarity Controller. Maximum resolution is 1920x1200 32bpp at 60Hz.
Hot-swap parts	Drives, power supplies, and fans.
Systems management	Operator panel with status LEDs. Optional External Diagnostics Handset with LCD display. Models with 16x 2.5-inch front drive bays can optionally support an Integrated Diagnostics Panel. XClarity Controller 2 (XCC2) embedded management based on the ASPEED AST2600 baseboard management controller (BMC). Dedicated rear Ethernet port for XCC2 remote access for management. Optional 2nd redundant XCC2 remote port supported, installs in the OCP slot. XClarity Administrator for centralized infrastructure management, XClarity Integrator plugins, and XClarity Energy Manager centralized server power management. Optional XCC Platinum to enable remote control functions and other features.
Security features	Chassis intrusion switch, Power-on password, administrator's password, Root of Trust module supporting TPM 2.0 and Platform Firmware Resiliency (PFR). Optional lockable front security bezel.
Operating systems supported	Microsoft Windows Server, Microsoft Windows 10 & 11, Red Hat Enterprise Linux, SUSE Linux Enterprise Server, VMware ESXi, Ubuntu Server. See the Operating system support section for specifics.
Limited warranty	Three-year or one-year (model dependent) customer-replaceable unit and onsite limited warranty with 9x5 next business day (NBD).

Components	Specification
Service and support	Optional service upgrades are available through Lenovo Services: 4-hour or 2-hour response time, 6-hour fix time, 1-year or 2-year warranty extension, software support for Lenovo hardware and some third-party applications.
Dimensions	Width: 445 mm (17.5 in.), height: 87 mm (3.4 in.), depth: 766 mm (30.1 in.). See Physical and electrical specifications for details.
Weight	Maximum: 38.8 kg (85.5 lb)

Models

ThinkSystem SR655 V3 models can be configured by using the [Lenovo Data Center Solution Configurator \(DCSC\)](#).

Configure-to-order (CTO) models are used to create models with factory-integrated server customizations. For CTO models, two types of base CTO models are available for the SR655 V3 as listed in the columns in the following table:

- General purpose base CTO models are for general business (non-HPC) and is selectable by choosing **General Purpose** mode in DCSC.
- AI and HPC base models are intended for Artificial Intelligence (AI) and High Performance Computing (HPC) configurations and solutions are enabled using the **AI & HPC Hardware - ThinkSystem Hardware** mode in DCSC. These configurations, along with Lenovo EveryScale Solutions, can also be built using [System x and Cluster Solutions Configurator \(x-config\)](#). **Tip:** Some HPC and AI models are not listed in DCSC and can only be configured in x-config.

Controlled GPU models: The "Controlled GPU" base CTO models listed in the table are the only models that support high-performance GPUs and accelerators. These models are classified under US Government ECCN regulations and have limited market and customer availability. All other base models do not support high-performance GPUs.

Preconfigured server models may also be available for the SR655 V3, however these are region-specific; that is, each region may define their own server models, and not all server models are available in every region.

The following table lists the base CTO models of the ThinkSystem SR655 V3 server.

Table 3. Base CTO models

Machine Type/Model General purpose	Machine Type/Model for AI and HPC	Description
7D9ECTO1WW	7D9ECTOLWW	ThinkSystem SR655 V3 - 3yr Warranty
7D9ECTO3WW	7D9ECTOHW	ThinkSystem SR655 V3 - 3yr Warranty with Controlled GPU
7D9FCTO1WW	7D9FCTOLWW	ThinkSystem SR655 V3 - 1yr Warranty

The SR655 V3 can now run Windows 10 and Windows 11, however only a subset of adapters and drives can be installed. For ease of configuration, the following Base CTO models have been announced to assist building a configuration that can be used with the client operating systems. For more information, see the [Windows 10 and Windows 11](#) section.

Table 4. Base CTO models for SR655 V3 with Windows 10 and Windows 11

Machine Type/Model General purpose	Description
7D9ECTO2WW	ThinkSystem SR655 V3 Workstation - 3 year Warranty
7D9FCTO2WW	ThinkSystem SR655 V3 Workstation - 1 year Warranty

Models of the SR655 V3 are defined based on whether the server has 2.5-inch drive bays at the front (called the 2.5-inch chassis) or whether it has 3.5-inch drive bays at the front (called the 3.5-inch chassis). For models, the feature codes for these chassis bases are as listed in the following table.

Table 5. Chassis base feature codes

Feature code	Description
BLKJ	ThinkSystem V3 2U 12x3.5" Chassis
BLKK	ThinkSystem V3 2U 24x2.5" Chassis

The following tables list the available models, grouped by region.

- [Models for Australia and New Zealand](#)
- [Models for EMEA region](#)

Refer to the Specifications section for information about standard features of the server.

Common to all models:

- Power supplies are Platinum unless otherwise stated
- All models include a Toolless Slide Rail Kit

Models for Australia and New Zealand

Common to all Australia and New Zealand models:

- All models include a Toolless Slide Rail Kit and Cable Management Arm

Table 6. Models for Australia and New Zealand

† Processor description: Processor model, number of cores, thermal design power (TDP), core frequency

Processors

The SR655 V3 supports processors in the fourth-generation AMD EPYC family of processors. The server supports one processor.

Topics in this section:

- [Processor options](#)
- [Processor features](#)
- [Thermal requirements by processor](#)
- [Lenovo Processor Neptune Core Module - Open-loop liquid cooling](#)
- [UEFI operating modes](#)
- [Platform Secure Boot](#)

Processor options

The SR655 V3 supports the following processor families:

- 5th Gen AMD EPYC processors (formerly codenamed "Turin"):
 - Processors with Zen 5 architecture, with high per-core performance
 - Processors with Zen 5c architecture, with high core density and best power efficiency
- 4th Gen AMD EPYC processors (formerly codenamed "Genoa")
- 4th Gen AMD EPYC processors with Zen 4c architecture (formerly codenamed "Bergamo"), with higher core counts, suitable for workloads like cloud-native applications

All supported processors have the following characteristics:

- 12 DDR5 memory channels
- 128 PCIe 5.0 I/O lanes, 64 lanes available for PCIe and NVMe devices

The following table lists the 5th Gen AMD EPYC processors supported by the SR655 V3.

Table 8. 5th Gen AMD EPYC processor support

† The maximum single-core frequency that the processor is capable of operating

Thermal requirements by processor

In the SR655 V3, the processor either uses a standard heatsink or a performance heatsink depending on the TDP of the processor. Performance heatsinks include two satellite heatsinks that connect to the main heatsink via liquid filled copper tubes.

Additional ambient temperature restrictions may apply. See the [Operating environment](#) section for details.

Lenovo Processor Neptune Core Module - Open-loop liquid cooling

The SR655 V3 also supports advanced direct-water cooling (DWC) capability with the Lenovo Processor Neptune Core Module. This module implements a liquid cooling solution where heat from the processors is removed from the rack and the data center using an open loop and coolant distribution units.

With the Processor Neptune Core Module, all heat generated by the processors is removed from the server using water. This means that the server fans and data center air conditioning units only need to remove the heat generated by the other components. This results in lower air conditioning costs and it enables the use of slower fans which results in lower overall power consumption.

The following figure shows the Lenovo Processor Neptune Core Module.

Figure 6. Lenovo Processor Neptune Core Module

The Processor Neptune Core Module also includes a leak detection module which can detect a leakage of more than 0.5ml (about 10 drops) along the length of the tube and then issue an event to the XClarity Controller. XCC will then post an error to the System Event Log and enable further actions. Once the liquid evaporates, a further event is issue to XCC.

The Processor Neptune Core Module is only available in CTO orders, not as a field upgrade. Ordering information is listed in the following table.

Table 12. Ordering information

Part number	Feature code	Description
CTO only	C1PM*	ThinkSystem V3 1U/2U Neptune Processor Direct Water Cooling Solution

* In DCSC, this feature code is listed in the Processor tab

Configuration notes:

- The Processor Neptune Core Module requires water infrastructure be available in the rack cabinet and data center, as described in the [Water infrastructure](#) section.
- All processor SKUs are supported
- All front drive bay configurations are supported
- Slot 6 is not available for adapters - the water loop is routed through the space otherwise occupied by slot 6
- Rear drive bays are supported
- 7mm drive bays are supported only in slot 3
- M.2 adapters are supported based on the configurations in the [Storage configurations](#) section
- Standard fans can be configured in most configurations
- The use of a cable management arm (CMA) is not supported

For more information, see the Thermal Rules page:

https://pubs.lenovo.com/sr655-v3/thermal_rules

UEFI operating modes

The SR655 V3 offers preset operating modes that affect energy consumption and performance. These modes are a collection of predefined low-level UEFI settings that simplify the task of tuning the server to suit your business and workload requirements.

The following table lists the feature codes that allow you to specify the mode you wish to preset in the factory for CTO orders.

UK and EU customers: For compliance with the ERP Lot9 regulation, you should select feature BFYA. For some systems, you may not be able to make a selection, in which case, it will be automatically derived by the configurator.

Table 13. UEFI operating mode presets in DCSC

Feature code	Description
BFYA	Operating mode selection for: "Maximum Efficiency Mode"
BFYB	Operating mode selection for: "Maximum Performance Mode"

The preset modes for the SR655 V3 are as follows:

- **Maximum Efficiency Mode** (feature BFYA): Maximizes performance/watt efficiency while maintaining reasonable performance

- **Maximum Performance Mode** (feature BFYB): Achieves maximum performance but with higher power consumption and lower energy efficiency.

For details about these preset modes, and all other performance and power efficiency UEFI settings offered in the SR655 V3, see the paper "Tuning UEFI Settings for Performance and Energy Efficiency on AMD Processor-Based ThinkSystem Servers", available from <https://lenovopress.lenovo.com/lp1267>.

Platform Secure Boot

Platform Secure Boot (PSB) is a feature of AMD EPYC processors that helps defend against threats to firmware. It is designed to provide protection in response to growing firmware-level remote attacks being seen across the industry. AMD Secure Boot extends the AMD silicon root of trust to help protect the system by establishing an unbroken chain of trust from the AMD silicon root of trust to the BIOS. The UEFI secure boot helps continue the chain of trust from the system BIOS to the OS Bootloader. This feature helps defend against remote attackers seeking to embed malware into firmware.

With PSB enabled, the processor is cryptographically bound to the server firmware code signing key once the processors are installed in the server and the server is powered on. From that point on, that processor can only be used with motherboards that use the same code signing key.

Disabling PSB will stop the protection against remote and local attackers seeking to embed malware into a platform's firmware, BIOS and even UEFI functions. Disabling PSB also allows you to install the processor in another server that you purchased from Lenovo, however, we do not recommend you do this by yourself. Please contact the Lenovo service team for further assistance.

By default, the server has Platform Secure Boot enabled on the installed processors, however for factory orders, you can choose to have the server with PSB disabled. To do this, select feature code C18D as listed in the following table. PSB can be later enabled in System Setup if desired.

Cannot be disabled once enabled: Once you enable PSB in a server, it cannot be disabled on those processors.

Table 14. Platform Secure Boot

Feature code	Description	Purpose
C0DF	Platform Secure Boot Enable	PSB is enabled in the factory and cannot later be disabled. Default choice in DCSC.
C18D	Platform Secure Boot Disable	PSB is not enabled in the factory. It can be later enabled in UEFI System Setup if desired.

If you add a second processor as a field upgrade and your server has PSB enabled, then as soon as you install the processor and power the server on, the processor is then cryptographically bound to the server, and can only be used in that server going forward.

Note: Platform Secure Boot (PSB) is different from the Secure Boot security feature described in the [Platform Firmware Resiliency](#) section.

Memory options

The SR655 V3 uses Lenovo TruDDR5 memory operating at up to 6000 MHz with 5th Gen AMD EPYC processors, and up to 4800 MHz with 4th Gen AMD EPYC processors. The server supports up to 12 DIMMs. The processor has 12 memory channels and supports 1 DIMM per channel. The server supports up to 3TB of memory using 12x 256GB 3DS RDIMMs.

Lenovo TruDDR5 memory uses the highest quality components that are sourced from Tier 1 DRAM suppliers and only memory that meets the strict requirements of Lenovo is selected. It is compatibility tested and tuned to maximize performance and reliability. From a service and support standpoint, Lenovo TruDDR5 memory automatically assumes the system warranty, and Lenovo provides service and support worldwide.

The following table lists the memory options supported in the SR655 V3 with 5th Gen AMD EPYC processors.

Table 15. Memory options for 5th Gen AMD EPYC processors

Part number	Feature code	Description	DRAM technology
x4 RDIMMs			
4X77A93528	C0CK	ThinkSystem 64GB TruDDR5 6400MHz (2Rx4) RDIMM-A	16Gb

CTO only	BYEE	ThinkSystem 128GB TruDDR5 4800MHz (4Rx4) 3DS RDIMM-A v1	16Gb
4X77A81444	BQ3B	ThinkSystem 256GB TruDDR5 4800MHz (8Rx4) 3DS RDIMM-A v2	16Gb
CTO only	BZPN	ThinkSystem 256GB TruDDR5 4800MHz (8Rx4) 3DS RDIMM-A v1	16Gb

9x4 RDIMMs (also known as Optimized or EC4 RDIMMs) are a lower-cost DDR5 memory option supported in ThinkSystem V3 servers. 9x4 DIMMs offer the same performance as standard RDIMMs (known as 10x4 or EC8 modules), however they support lower fault-tolerance characteristics. Standard RDIMMs and 3DS RDIMMs support two 40-bit subchannels (that is, a total of 80 bits), whereas 9x4 RDIMMs support two 36-bit subchannels (a total of 72 bits). The extra bits in the subchannels allow standard RDIMMs and 3DS RDIMMs to support Single Device Data Correction (SDDC), however 9x4 RDIMMs do not support SDDC. Note, however, that all DDR5 DIMMs, including 9x4 RDIMMs, support Bounded Fault correction, which enables the server to correct most common types of DRAM failures.

For more information on DDR5 memory, see the Lenovo Press paper, *Introduction to DDR5 Memory*, available from <https://lenovopress.com/lp1618>.

The following rules apply when selecting the memory configuration:

- Memory rated at 4800 MHz is only supported with 4th Gen processors. Memory rated at 6400 MHz memory is only supported with 5th Gen processors (and operates at up to 6000 MHz).
- The SR655 V3 supports quantities 1, 2, 4, 6, 8, 10, 12 DIMMs per processor; other quantities not supported
- The server supports four types of DIMMs: 9x4 RDIMMs, 10x4 RDIMMs, x8 RDIMMs and 3DS RDIMMs
 - UDIMMs and LRDIMMs are not supported
- Mixing of DIMM types is not supported (for example, 9x4 DIMMs with 10x4 RDIMMs)
- Mixing x4 and x8 DIMMs is not supported
- Mixing of DRAM technology (16Gb, 24Gb, 32Gb) is not supported. See the column in the above table.
- Mixing of 128GB 3DS RDIMMs and 256GB 3DS RDIMMs is not supported
- Mixing of DIMM rank counts is supported. Follow the required installation order installing the DIMMs with the higher rank counts first.
- Mixing of DIMM capacities is supported, however only two different capacities are supported across all channels of the processor (eg 16GB and 32GB). Follow the required installation order installing the larger DIMMs first.
- Memory operates at the speed of the memory bus of the processor - see the [Processor features](#) section for specifics
- The use of the 128GB 3D RDIMM feature BYEE has additional ambient temperature requirements; see https://pubs.lenovo.com/sr655-v3/thermal_rules for information

Note: Memory mirroring and memory rank sparing are not supported.

For best performance, consider the following:

- Ensure the memory installed is at least the same speed as the memory bus of the selected processor.
- Populate all 12 memory channels with identical DIMMs (same Lenovo part number)

The following memory protection technologies are supported:

- ECC detection/correction
- Bounded Fault detection/correction
- SDDC (for x4-based memory DIMMs; look for "x4" in the DIMM description. Not supported with 9x4 RDIMMs)
- Patrol/Demand Scrubbing
- DRAM Address Command Parity with Replay
- DRAM Uncorrected ECC Error Retry
- On-die ECC
- ECC Error Check and Scrub (ECS)
- Post Package Repair

Internal storage

The SR655 V3 has three drive bay zones and supports up to 20x 3.5-inch or 40x 2.5-inch hot-swap drive bays or a combination of drive bays, depending on the selected chassis and backplane configuration. The server also supports configurations without any drive bays if desired.

The three drive bay zones are as follows:

- Front:
 - Up to 12x 3.5-inch hot-swap bays, or
 - Up to 24x 2.5-inch hot-swap bays
- Middle:
 - 4x 3.5-inch hot-swap bays, or
 - 8x 2.5-inch hot-swap bays
- Rear:
 - Up to 4x 3.5-inch hot-swap bays, or
 - Up to 8x 2.5-inch hot-swap bays
 - Also supports 2x 7mm hot-swap drives bays

All drives are hot-swap and are accessible from the front, from the rear, or from drive bays that are located in the middle of the server (accessible when you remove the top cover of the server).

The server also supports one or two M.2 drives, installed in an M.2 adapter internal to the server.

In this section:

- [NVMe drive support](#)
- [Front drive bays](#)
- [Mid drive bays](#)
- [Rear drive bays](#)
- [Storage configurations](#)
- [Field upgrades](#)
- [RAID flash power module \(supercap\) support](#)
- [7mm drives](#)
- [M.2 drives](#)
- [SED encryption key management with SKLM](#)

NVMe drive support

The SR655 V3 supports NVMe drives to maximize storage performance.

- Up to 24 NVMe drives in a 2.5-inch drive configuration, without oversubscription (that is, each x4 drive has a dedicated x4 (4 lanes) connection to the processor, either direct to the processor or via a retimer adapter)
 - Up to 24 installed in front bays
- Up to 32 NVMe drives in a 2.5-inch drive configuration, with oversubscription (using NVMe switch adapters)
 - 24 installed in front bays
 - 8 installed in mid-chassis bays
- Up to 8 NVMe drives in a 3.5-inch drive configuration, without oversubscription
 - All installed in mid bays

Riser 3 support: The use of the onboard NVMe ports is mutually exclusive with Riser 3, as these use the same PCIe connectors. See the [System architecture](#) section.

The specifics of these configurations are covered in the [Storage configurations](#) section. The tables in those sections indicate the number of NVMe drives in each configuration.

In addition, the SR655 V3 supports two 7mm NVMe drives for use as boot drives. These two drives optionally support RAID via a separate RAID adapter installed in a PCIe slot.

The RAID 940-8i and RAID 940-16i adapters also support NVMe through a feature named Tri-Mode support (or Trimode support). This feature enables the use of NVMe U.3 drives at the same time as SAS and SATA drives. Tri-Mode requires an AnyBay backplane. Cabling of the controller to the backplanes is the same as with SAS/SATA drives, and the NVMe drives are connected via a PCIe x1 link to the controller.

NVMe drives connected using Tri-Mode support provide better performance than SAS or SATA drives: A SATA SSD has a data rate of 6Gbps, a SAS SSD has a data rate of 12Gbps, whereas an NVMe U.3 Gen 4 SSD with a PCIe x1 link will have a data rate of 16Gbps. NVMe drives typically also have lower latency and higher IOPS compared to SAS and SATA drives. Tri-Mode is supported with U.3 NVMe drives and requires an AnyBay backplane.

Tri-Mode requires U.3 drives: Only NVMe drives with a U.3 interface are supported. U.2 drives are not supported. See the [Internal drive options](#) section for the U.3 drives supported by the server.

Front drive bays

The front drive bay zone supports the following configurations:

- 8x or 12x 3.5-inch drive bays (all hot-swap)
- 8x, 16x or 24x 2.5-inch drive bays (all hot-swap)
- 4x 2.5-inch drive bays (all hot-swap) with support for front PCIe slots (planned for 2Q/2023)
- No backplanes and no drives (supports [field upgrades](#))

The specific combinations that are supported in the SR655 V3 are shown in the following figures. The feature codes listed in the figures are the backplane feature codes when ordering CTO and correspond to the feature codes listed in the table below the figure. In the figures, G4 refers to PCIe Gen4 and G5 refers to PCIe Gen5.

Figure 7. SR655 V3 front drive bay configurations - 3.5-inch drive bays

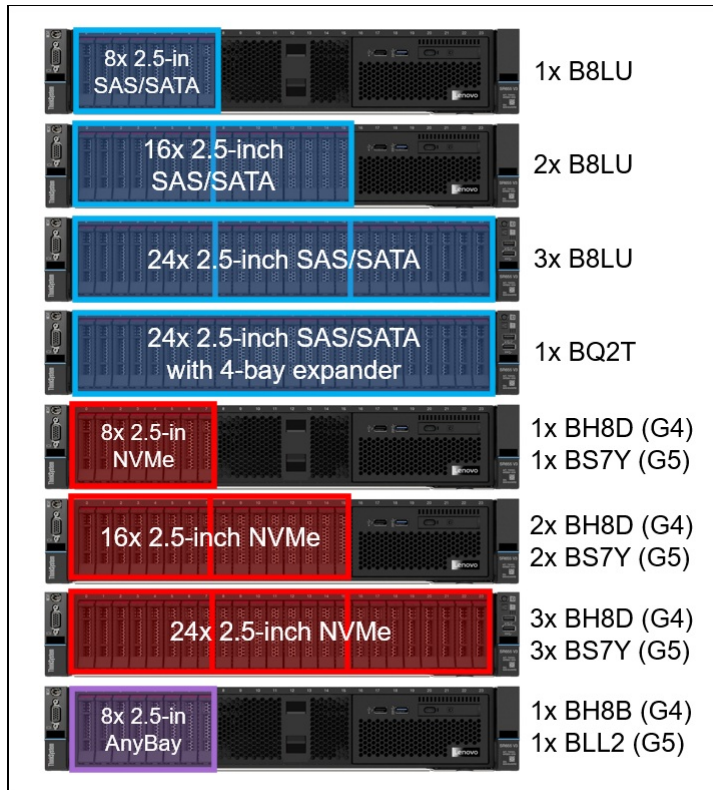

Figure 8. SR655 V3 front drive bay configurations - 2.5-inch drive bays, all the same drive type

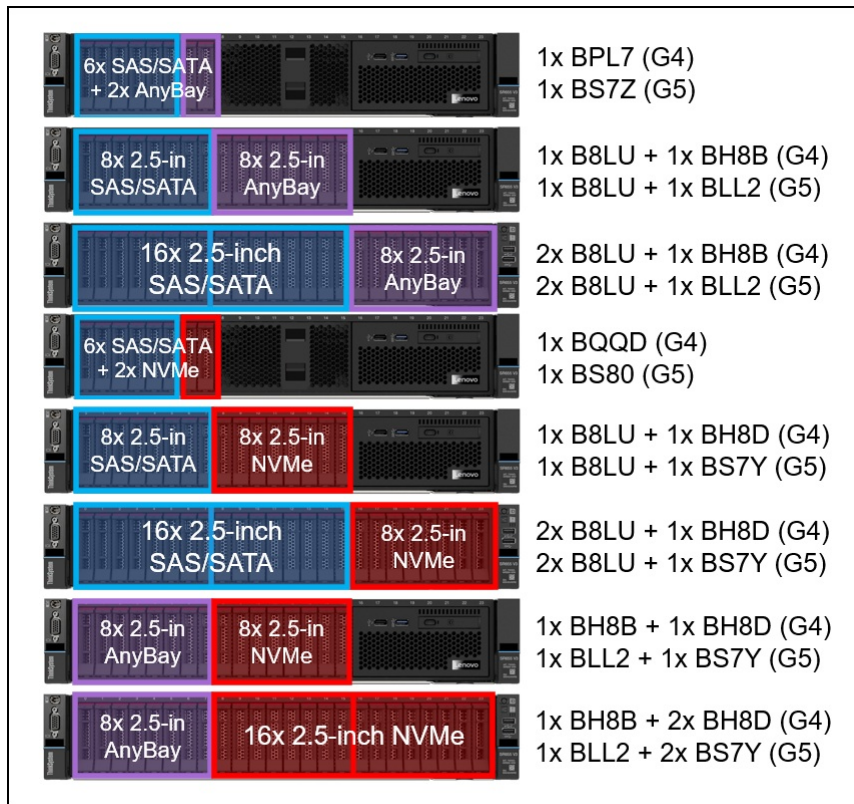

Figure 9. SR655 V3 front drive bay configurations - 2.5-inch drive bays, combinations

Figure 10. SR655 V3 front drive bay configurations - 2.5-inch drive bays with front PCIe slots

The backplanes used to provide these drive bays are listed in the following table.

Field upgrades: All front backplanes are available as part numbers for field upgrades along with require cable option kits, as described in the [Field upgrades](#) section below.

Table 17. Backplanes for front drive bays

Feature	Description	Bays	PCIe Gen	Maximum supported
Front 3.5-inch drive backplanes				
B8LP	ThinkSystem 2U 8x3.5" SAS/SATA Backplane	8	-	1
B8LT	ThinkSystem 2U 12x3.5" SAS/SATA Backplane	12	-	1
BPL8	ThinkSystem 2U 8x3.5" SAS/SATA+4 AnyBay Backplane	12	Gen4	1
BPL9	ThinkSystem 2U 8x3.5" SAS/SATA+4 NVMe Backplane	12	Gen4	1
BQ2S	ThinkSystem 2U 12x3.5" SAS/SATA with Rear 4-Bay Expander Backplane	12*	-	1
Front 2.5-inch backplanes				
B8LU	ThinkSystem 2U 8x2.5" SAS/SATA Backplane	8	-	3
BQ2T	ThinkSystem 2U 24x2.5" SAS/SATA with Rear 4-Bay Expander Backplane	24	-	1
BH8D	ThinkSystem 2U/4U 8x2.5" NVMe Backplane	8	Gen4	3
BS7Y	ThinkSystem V3 2U 8x2.5" NVMe Gen5 Backplane	8	Gen5	3
BH8B	ThinkSystem 2U/4U 8x2.5" AnyBay Backplane	8	Gen4	3
BLL2	ThinkSystem V3 2U 8x2.5" AnyBay Gen5 Backplane	8	Gen5	1
BPL7	ThinkSystem 2U 6x2.5" SAS/SATA+2 AnyBay Backplane	8	Gen4	1
BS7Z	ThinkSystem 2U 6x2.5" SAS/SATA+2 AnyBay Gen5 Backplane	8	Gen5	1
BQQD	ThinkSystem 2U 2.5" 6 SAS/SATA+2 NVMe Backplane	8	Gen4	1
BS80	ThinkSystem 2U 6x2.5" SAS/SATA+2 NVMe Gen5 Backplane	8	Gen5	1
Integrated Diagnostics Panel (for 2.5-inch configurations with 8 or 16 bays only)				
BMJA	ThinkSystem 2U 16x2.5" Front Operator Panel v2	-	-	1

* Backplane has an onboard SAS expander that provides connectivity to SAS/SATA drive bays in a separate rear backplane (order the rear backplane separately). See also note below for BQ2T.

The use of front drive bays has the following configuration rules:

- The SR655 V3 also supports configurations without any drive bays, allowing for drive bay upgrades as described in the [field upgrades](#) section.
- If 3.5-inch front drive bays are used, an internal (CFF) RAID adapter or HBA is not supported as the adapter and bays occupy the same physical space

- Any 8x 2.5-inch and 16x 2.5-inch drive configuration (SAS/SATA, AnyBay, or NVMe) can optionally be configured for use with the Integrated Diagnostics Panel as described in the [Local management](#) section. 3.5-inch drive configurations do not support the Integrated Diagnostics Panel. With the Integrated Diagnostics Display, 8-bay configurations can be upgrade to 16 bays, however 16-bay configurations cannot be upgrade to 24 bays.
- If you are building a server configuration that includes the ThinkSystem 2U 24x2.5" SAS/SATA with Rear 4-Bay Expander Backplane (feature BQ2T) and the order also includes a rack cabinet, then you can configure at most 6 drives to be installed in the factory. The remaining drives must be ordered separately using the option part numbers for the drives. This requirement does not apply if the order does not include a rack cabinet. The requirement is due to the shock/vibration limits of the 24x 2.5-inch backplane.

Mid drive bays

The SR655 V3 supports hot-swap drives installed in the middle of the server chassis. The drive bays are accessible by removing the top lid of the server and levering the mid drive chassis up at the front.

The following configurations are supported:

- 4x 3.5-inch hot-swap SAS/SATA drive bays
- 8x 2.5-inch hot-swap SAS/SATA drive bays
- 8x 2.5-inch hot-swap NVMe drive bays

The drive bays in the open position are shown in the following figure.

M.2 support: When mid drive bays are configured, the M.2 adapter is installed on the mid drive bay mechanical as shown in the images.

Figure 11. Mid-chassis drive bays

The backplanes used to provide these drive bays are listed in the following table.

Table 18. Backplanes for mid drive bays

Feature	Description	Bays	PCIe Gen	Maximum supported
Mid 3.5-inch backplanes				
BCQK	ThinkSystem 2U 4x3.5" SAS/SATA Middle Backplane	4	-	1
Mid 2.5-inch backplanes				
BCQL	ThinkSystem 2U 4x2.5" SAS/SATA Middle Backplane	4	-	2‡
BDY7	ThinkSystem 2U 4x2.5" Middle NVMe Backplane	4	Gen4	2‡
BS81	ThinkSystem 2U 4x2.5" Middle NVMe Gen5 Backplane	4	Gen5	2‡

‡ 2.5-inch drive backplanes for the mid-chassis area must be installed in pairs and cannot be mixed.

Field upgrades: Backplanes are available as part numbers for field upgrades along with require cable option kits, as described in the [Field upgrades](#) section below.

The use of drive bays in the mid-chassis area has the following configuration rules:

- All processors are supported. Higher TDP processors will require the performance heatsinks.
- Full-length adapter cards are not supported
- GPUs (including low profile GPUs such as the T4) are not supported
- The use of mid drive bays may require Riser 1 or Riser 2 be installed, since power for the mid bay

backplanes comes from a riser

Rear drive bays

The SR655 V3 supports hot-swap drives installed at the rear of the server chassis. Supported configurations are as follows:

- 3.5-inch hot-swap drives
 - 2x SAS/SATA drive bays
 - 4x SAS/SATA drive bays
- 2.5-inch hot-swap drives
 - 4x SAS/SATA drive bays
 - 4x AnyBay drive bays
 - 8x SAS/SATA drive bays

The configurations are shown in the following figure.

Figure 12. Rear 2.5-inch and 3.5-inch drive bay configurations

The backplanes used to provide these drive bays are listed in the following table.

Table 19. Backplanes for rear drive bays

Feature	Description	Bays	PCIe Gen	Maximum supported
Rear 3.5-inch backplanes				
B8L3	ThinkSystem 1U/2U 4x3.5" SAS/SATA Backplane	4	-	1
BAG7	ThinkSystem 2U 2x3.5" SAS/SATA Rear Backplane	2	-	1
Rear 2.5-inch backplanes				
B8LV	ThinkSystem 2U 4x2.5" SAS/SATA Backplane	4	-	1
B97X	ThinkSystem 2U 8x2.5" SAS/SATA Rear Backplane	8	-	1
BQ2U	ThinkSystem V3 1U/2U 4x2.5" AnyBay Backplane	4	Gen4	1
BSE3	ThinkSystem 4x2.5" AnyBay Gen5 Backplane	4	Gen5	1

Field upgrades: Backplanes are available as part numbers for field upgrades along with require cable option kits, as described in the [Field upgrades](#) section below.

In addition, the server supports two 7mm-thickness hot-swap SSDs which are installed in place of either slot 3 or slot 6 (not both). These 7mm drives can be used in conjunction with any rear drive 2.5-inch or 3.5-inch bay combination. See the [7mm drives](#) section for details.

The use of rear drive bays has the following configuration rules:

- The use of rear bays restricts the number of slots and the choice of risers that are supported. See the [I/O expansion](#) section for details.
- The 7mm rear drive kit is supported in either slot 3 or slot 6 but not both at the same time.
- The 7mm drive enclosure is connected to an onboard connectors and cannot be connected to any installed RAID adapter or HBA.

Storage configurations

This section describes the various combinations of front and rear drives that the server supports, as well as M.2 support.

Tip: These tables are based on Storage matrix in TRD V4.9

In this section:

- [Overview of configurations - 3.5-inch front drive bays](#)
- [Overview of configurations - 2.5-inch front drive bays](#)
- [Details - 3.5-inch front drive bays](#)
- [Details - 2.5-inch front drive bays](#)

The following tables summarize the storage configurations for the SR655 V3. For details, including processor requirements, M.2 and 7mm support, and controller selections, see each of the Details tables.

Overview - 3.5-inch front drives

The following table summarizes the configurations that use 3.5-inch front drive bays.

Click to jump down to the [details of the 3.5-inch front drive configurations](#) .

Return to [Storage configurations](#).

Table 20. Overview - 3.5-inch front drives

Config	Total drives (NVMe)	Front				Middle			Rear				Backplanes
		SAS/SATA	AnyBay	NVMe	EDSFF	3.5" SAS/SATA	2.5" SAS/SATA	2.5" NVMe	3.5" SAS/SATA	2.5" SAS/SATA	2.5" AnyBay	2.5" NVMe

Field upgrades

The SR655 V3 is orderable without drive bays, allowing you to add a backplane, cabling and controllers as field upgrades. The server also supports upgrading some configurations by adding additional front drive bays (for example, upgrading from 8 to 16x 2.5-inch drive bays).

For more information about the backplane kits and cable kits, see the Lenovo server options site:
https://serveroption.lenovo.com/cable_kit_options/

The upgrades are listed as follows:

- [2.5-inch and 3.5-inch chassis drive bay upgrades](#)
- [Upgrades to Retimer adapters](#)
- [Upgrades to an Internal \(CFF\) HBA/RAID adapter](#)

2.5-inch and 3.5-inch chassis drive bay upgrades

To add drive bays you will need to order both drive backplanes and cable kits. Backplane kits do not include cables.

In the case of 8x2.5" backplanes, there are cable kits for BP1, BP2 and BP3, which correspond to the backplanes as shown in the following figure. Select the cables related to the backplane location you wish to upgrade.

Figure 13. Backplane numbering

4x3.5-inch Rear SAS/SATA drive bays	<ul style="list-style-type: none"> • 4XH7A60939, ThinkSystem V2/V3 2U Rear 4x3.5" SAS/SATA Rear Backplane Option Kit • 4X97A86421, ThinkSystem SR655 V3 3.5" Chassis Rear Backplane SAS/SATA Cable Kit

When adding drive bays, you will also need to add the appropriate storage controller(s). Consult the tables in the [Storage configurations](#) section to determine what controller sections are supported and what additional controllers you will need. Controllers are described in the [Controllers for internal storage](#) section.

Upgrades to Retimer adapters

If you are upgrading to a configuration that includes a Retimer adapter (see the Detailed tables in the [Storage configurations](#) section), then you will need to also order one of the following cable kits.

Table 25. Cable kits when upgrading to a Retimer configuration

Part number	Description	Quantity required
4X97A86434	ThinkSystem SR655 V3 24 NVMe Cable Kit	1
4X97A86435	ThinkSystem SR655 V3 32 NVMe Cable Kit	1

Upgrades to an Internal (CFF) HBA/RAID adapter

If you want to add an internal (CFF) storage adapter (HBA, RAID adapter or SAS expander) to a configuration, you will need to order the cable kit as listed in the following table. Suitable upgrades are either replacing an existing adapter in a rear PCIe slot, or adding the CFF adapter to a server without any storage adapter installed.

The cable kit to order is listed in the following table.

Table 26. Cable kit when upgrading to an Internal HBA/RAID adapter

Part number	Description	Quantity required
4X97A86433	ThinkSystem SR655 V3 Internal Raid Adapter Cable Kit	1

RAID flash power module (supercap) support

If you plan to add one of the RAID adapters that includes a RAID flash power module (supercap) as a field upgrade, then you may also need to order a Supercap installation kit for the supercap, depending on the location where the supercap will be installed. For CTO orders, the components needed are automatically derived when you select the RAID adapter.

The adapters that this applies to are as follows:

- Any supported RAID 9350 adapter
- Any supported RAID 940 adapter

The location of the supercaps depends on the mid-chassis drive cage used in the server, as shown in the following table.

Table 27. Supercap support

Mid drive cage	Supercaps supported	Location of supercaps	Supercap holder
No mid drive cage	4	Mounted on the air baffle	Not needed
2.5-inch drives	2	Mounted on the left side of the mid drive cage	Integrated into the left side of the 2.5-inch mid drive cage
3.5-inch drives	1	Mounted under the system fan cage	Included with ThinkSystem SR655 V3 4x3.5" SAS/SATA Middle Backplane Option Kit (4XH7A86758) or order separately (see below)

For 3.5-inch drive bay configurations, if the server already has 3.5-inch mid-chassis drive bays, then the supercap holder is already present under the system fan cages. If you plan to add 3.5-inch mid-chassis drive bays by adding ThinkSystem SR655 V3 4x3.5" SAS/SATA Middle Backplane Option Kit (4XH7A86758), then the supercap holder is part of the option kit.

7mm drives

The SR655 V3 supports two 7mm drives, either both SATA or both NVMe, at the rear of the server. These drives go in place of either PCIe slot 3 (Riser 1) or PCIe slot 6 (Riser 2) as shown in the following figure.

Figure 14. Rear 7mm drive bay configurations

For CTO orders, the configuration includes the drive bays and the cage the the drive bays are mounted on to. The cage required depends on where the 7mm drives are located (Riser 1 or Riser 2) and whether there are PCIe slots above the 7mm drive bays. The following table lists the ordering information.

Tip for 4x 3.5-inch rear drives: If you wish to configure 4x 3.5-inch rear drives plus 7mm drives in a CTO configuration, the 7mm drives will install in slot 6. You should specify riser card BLKP for Riser 1 and then leave Riser 2 without a riser selected.

Table 28. CTO feature codes for 7mm drives

Feature code	Description	Maximum supported
Backplane - 7mm drives		
BU0N	ThinkSystem 7mm SATA/NVMe 2-Bay Rear Enablement Kit v2	1
B8P3	ThinkSystem 2U 7mm Drive Kit w/ NVMe RAID (Marvell RAID)	1
BYFG	ThinkSystem 7mm SATA/NVMe 2-Bay Rear Hot-Swap RAID Enablement Kit (Broadcom RAID)	1
Hardware RAID support for ThinkSystem 7mm SATA/NVMe 2-Bay Rear Enablement Kit v2 (BU0N)		
BT7N	ThinkSystem RAID 5350-8i for M.2/7mm SATA Boot Enablement	1
BT7P	ThinkSystem RAID 540-8i for M.2/7mm NVMe Boot Enablement	1

The use of the 7mm rear drive bays has the following configuration rules:

- The 7mm rear drive kit is supported in either slot 3 or slot 6 but not both at the same time.
- M.2 RAID and 7mm RAID are mutually exclusive: they are not supported together in the same configuration
- For ThinkSystem 7mm SATA/NVMe 2-Bay Rear Enablement Kit v2 (feature BU0N):
 - The 7mm drive bays support either SATA drives or NVMe drives but not both. You specify SATA or NVMe in the configurator using feature codes BTTV (SATA) or BTTW (NVMe).
 - If RAID support is not required, the 7mm drives connect to an onboard port; No additional adapter is required
 - If RAID support is required, select feature code BS7A in the configurator to enable RAID
 - The support of RAID-1 with the 7mm drives requires an additional RAID adapter that is installed in PCIe slot 3:
 - RAID support for 7mm SATA drives requires a RAID 5350-8i adapter (feature BT7N)
 - RAID support for 7mm NVMe drives requires a RAID 540-8i adapter operating in Tri-Mode (feature BT7P)
 - The RAID adapter used for 7mm drive support cannot be configured for use with other drive bays (not even with M.2)
- For ThinkSystem 2U 7mm Drive Kit w/ NVMe RAID (feature B8P3)
 - The adapter only supports NVMe drives
 - RAID functionality is integrated into the 7mm adapter using a Marvell 88NR2241 NVMe RAID Controller
- For ThinkSystem 7mm SATA/NVMe 2-Bay Rear Hot-Swap RAID Enablement Kit (feature BYFG)
 - The adapter supports either SATA or NVMe drives
 - RAID functionality is integrated into the 7mm adapter using a Broadcom RAID Controller

7mm drive field upgrades

For field upgrades, using the following ordering information. The kits include two cages for use depending on your PCIe slot configuration. The cages are for either Riser 1 or Riser 2. The part numbers also include the cables necessary to connect the 7mm backplane to either the system board or RAID adapter.

Table 29. Field upgrade part numbers for 7mm drives

Part number	Description	Purpose
7mm Enablement Kits		
4XH7A87560	ThinkSystem SR655 V3 7mm SATA/NVMe 2-Bay Non-RAID Enablement Kit <ul style="list-style-type: none"> • 2-bay hot-swap drive enclosure • 2FH+7mm SSD Riser Cage (with 2 FH PCIe slots) • 7mm SSD Riser Cage (without PCIe slots) • 2x 7mm drive bay fillers • Signal and power cables for onboard connections 	7mm drive bays for SATA or NVMe drive support with no RAID support (does not include cables needed for RAID support with a separate adapter)

Part number	Description	Purpose
4XH7A87561	ThinkSystem SR655 V3 7mm SATA/NVMe 2-Bay RAID Enablement Kit <ul style="list-style-type: none"> • 2-bay SATA hot-swap drive enclosure • 2FH+7mm SSD Riser Cage (with 2 FH PCIe slots) • 7mm SSD Riser Cage (without PCIe slots) • 2x 7mm drive bay fillers • Signal and power cables for RAID adapter connectivity 	7mm drive bays for SATA or NVMe drives, plus cables for use with a RAID adapter. Requires a separate RAID adapter for RAID support.
4X97A88531	ThinkSystem SR655 V3 7mm NVMe 2-Bay RAID Enablement Kit <ul style="list-style-type: none"> • 2-bay hot-swap drive enclosure • 2FH+7mm SSD Riser Cage (with 2 FH PCIe slots) • 7mm SSD Riser Cage (without PCIe slots) • 2x 7mm drive bay fillers • Signal and power cables for onboard connections 	7mm drive bays for NVMe drive support. RAID support is integrated into the adapter using an onboard Marvell 88NR2241 NVMe RAID controller.
4XH7A93167	ThinkSystem SR665 V3/SR655 V3 7mm RAID B540p-2HS SATA/NVMe Enablement Kit <ul style="list-style-type: none"> • 2-bay hot-swap drive enclosure • 2FH+7mm SSD Riser Cage (with 2 FH PCIe slots) • 7mm SSD Riser Cage (without PCIe slots) • 2x 7mm drive bay fillers • Signal and power cables for onboard connections 	7mm drive bays for SATA or NVMe drive support. RAID support is integrated into the adapter using an onboard Broadcom RAID controller.
RAID adapters for optional 7mm HW RAID support (for use with 4XH7A87561)		
4Y37A72482	ThinkSystem RAID 5350-8i PCIe 12Gb Adapter	RAID adapter needed for SATA RAID-1 with 2x 7mm SATA drives
4Y37A78834	ThinkSystem RAID 540-8i PCIe Gen4 12Gb Adapter	RAID adapter needed for NVMe RAID-1 with 2x 7mm NVMe drives Tip: Once the 540-8i adapter is installed, it will need to be configured to operate in Tri-mode to enable NVMe RAID.

M.2 drives

The SR655 V3 supports one or two M.2 form-factor SATA or NVMe drives for use as an operating system boot solution or as additional storage.

The M.2 drives install into an M.2 module which is mounted horizontally in the server:

- In servers without mid-chassis drives, the M.2 module is mounted on the air baffle
- With a mid-chassis drive cage (2.5-inch or 3.5-inch), the M.2 module is mounted on the drive cage, as shown in the [Mid drive bays](#) section.

The supported M.2 modules are listed in the following table. For field upgrades see the [M.2 field upgrades](#) section below.

Table 30. M.2 modules

Part number	Feature code	Description	SATA drives	NVMe drives	RAID	Maximum supported	Windows 10/11 support
4Y37A09738	B5XJ	ThinkSystem M.2 SATA/NVMe 2-Bay Enablement Kit	Yes	Yes (x1 lane)	No	1	Supported
4Y37A79663	BM8X	ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter	Yes	Yes (x4 lanes)	Optional	1	Supported
4Y37A09750	B8P9	ThinkSystem M.2 NVMe 2-Bay RAID Adapter	No	Yes (x1 lane)	Integrated (Marvell)	1	No
4Y37A90063	BYFF	ThinkSystem M.2 RAID B540i-2i SATA/NVMe Adapter	Yes	Yes (x1 lane)	Integrated (Broadcom)	1	Supported

ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter (4Y37A79663, BM8X) optionally supports RAID with the addition of a separate RAID adapter is required. For CTO orders, ordering information is listed in the following table to derive the required RAID adapter.

Table 31. CTO feature codes to select M.2 RAID (ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter, BM8X, only)

Feature code	Description	RAID support	Maximum supported
BT7N	ThinkSystem RAID 5350-8i for M.2/7mm SATA Boot Enablement	SATA	1
BT7P	ThinkSystem RAID 540-8i for M.2/7mm NVMe Boot Enablement	NVMe	1

Configuration notes:

- M.2 is not supported with all storage configurations - see [Storage configurations](#) for details.
- M.2 RAID and 7mm RAID are mutually exclusive: they are not supported together in the same configuration
- For field upgrades, an additional cable is needed as described in the [M.2 field upgrades](#) section below
- For ThinkSystem M.2 SATA/NVMe 2-Bay Enablement Kit (4Y37A09738):
 - RAID is not supported
 - The installation of at least one M.2 drive is required. In the configurator, at least one M.2 drive must be selected
- For ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter (4Y37A79663):
 - The support of RAID-1 with the M.2 drives requires an additional RAID adapter that is installed in PCIe slot 3:
 - RAID support for M.2 SATA drives requires a RAID 5350-8i adapter (feature BT7N)
 - RAID support for M.2 NVMe drives requires a RAID 540-8i adapter operating in Tri-Mode (feature BT7P)
 - The RAID adapter used for M.2 drive support cannot be configured for use with other drive bays (not even with 7mm)
 - If RAID support is not required, the M.2 adapter connects to an onboard port. No additional adapter is required
- For ThinkSystem M.2 NVMe 2-Bay RAID Adapter (4Y37A09750):
 - RAID is implemented using an onboard Marvell 88NR2241 NVMe RAID controller
- For ThinkSystem M.2 RAID B540i-2i SATA/NVMe Adapter (4Y37A90063):
 - RAID is implemented using an onboard Broadcom RAID controller

Supported drives are listed in the [Internal drive options](#) section.

The ThinkSystem M.2 SATA/NVMe 2-Bay Enablement Kit has the following features:

- Supports one or two M.2 drives, either SATA or NVMe
- When two drives installed, they must be either both SATA or both NVMe
- Support 42mm, 60mm, 80mm and 110mm drive form factors (2242, 2260, 2280 and 22110)
- On the SR655 V3, no RAID support
- No onboard RAID; RAID functionality is provided by a separate adapter (SATA or NVMe)
- Either 6Gbps SATA or PCIe 3.0 x1 interface to the drives depending on the drives installed
- Supports monitoring and reporting of events and temperature through I2C
- Firmware update via Lenovo firmware update tools
- When connected to a separate PCIe RAID adapter, supports SED drive encryption via the RAID adapter, otherwise no SED support

The ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter has the following features:

- Supports one or two M.2 drives, either SATA or NVMe
- When two drives installed, they must be either both SATA or both NVMe
- Support 42mm, 60mm, 80mm and 110mm drive form factors (2242, 2260, 2280 and 22110)
- No onboard RAID; RAID functionality is provided by a separate adapter (SATA or NVMe)
- Either 6Gbps SATA or PCIe 4.0 x4 interface to the drives depending on the drives installed
- Supports monitoring and reporting of events and temperature through I2C
- Firmware update via Lenovo firmware update tools
- When connected to a separate PCIe RAID adapter, supports SED drive encryption via the RAID adapter, otherwise no SED support

The ThinkSystem M.2 NVMe 2-Bay RAID Adapter (4Y37A09750) has the following features:

- Supports one or two NVMe M.2 drives
- Support 42mm, 60mm, 80mm and 110mm drive form factors (2242, 2260, 2280 and 22110)
- RAID support via an onboard Marvell 88NR2241 NVMe RAID Controller
- With 1 drive, supports single-drive RAID-0
- With 2 drives, supports 2-drive RAID-0, 2-drive RAID-1, or two single-drive RAID-0 arrays
- PCIe 3.0 x2 host interface; PCIe 3.0 x1 connection to each drive
- Management and configuration support via UEFI and OS-based tools
- Supports monitoring and reporting of events and temperature through I2C
- Firmware update via Lenovo firmware update tools
- No support for SED drive encryption

The ThinkSystem M.2 RAID B540i-2i SATA/NVMe Adapter (4Y37A90063) has the following features:

- Supports one or two M.2 drives, either SATA or NVMe
- Support 42mm, 60mm, 80mm and 110mm drive form factors (2242, 2260, 2280 and 22110)
- RAID support via an onboard Broadcom SAS3808N RAID Controller
- With 1 drive, supports JBOD
- With 2 drives, supports 2-drive RAID-0, 2-drive RAID-1, or JBOD
- PCIe 4.0 x2 host interface; PCIe 4.0 x1 connection to each drive
- Management and configuration support via UEFI and OS-based tools
- Supports monitoring and reporting of events and temperature
- Firmware update via Lenovo firmware update tools
- Supports SED drive encryption

M.2 field upgrades

For field upgrades, the SR655 V3 also requires additional cables necessary to connect the M.2 to either the system board or RAID adapter. Ordering information is listed in the following table.

Table 32. Cable kit for M.2 drive support

Part number	Description	Purpose
M.2 Cable Kit - cables for use with RAID adapters or with onboard (non-RAID) connectivity		
4X97A87726	ThinkSystem SR655 V3 M.2 x4 SATA/NVMe Cable Kit	Cable kit for ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter (4Y37A79663)
4X97A87559	ThinkSystem SR655 V3 M.2 SATA/NVMe Cable Kit	Cable kit for ThinkSystem M.2 SATA/NVMe 2-Bay Enablement Kit (4Y37A09738) or ThinkSystem M.2 NVMe 2-Bay RAID Adapter (4Y37A09750)
4X97A93808	ThinkSystem SR650 V3/SR655 V3 M.2 RAID B540i-2i SATA/NVMe Cable Kit	Cable kit for ThinkSystem M.2 RAID B540i-2i SATA/NVMe Adapter (4Y37A90063)
RAID adapters for M.2 RAID support (4Y37A79663 only)		
4Y37A72482	ThinkSystem RAID 5350-8i PCIe 12Gb Adapter (SATA M.2 support)	RAID adapter to provide M.2 SATA RAID support
4Y37A78834	ThinkSystem RAID 540-8i PCIe Gen4 12Gb Adapter (NVMe M.2 support using Tri-Mode)	RAID adapter to provide M.2 NVMe support using Tri-Mode Tip: Once the 540-8i adapter is installed, it will need to be configured to operate in Tri-mode to enable NVMe RAID.

SED encryption key management with SKLM

The server supports self-encrypting drives (SEDs) as listed in the [Internal drive options](#) section. To effectively manage a large deployment of these drives in Lenovo servers, IBM Security Key Lifecycle Manager (SKLM) offers a centralized key management solution.

The IBM Security Key Lifecycle Manager software is available from Lenovo using the ordering information listed in the following table.

Table 33. IBM Security Key Lifecycle Manager licenses

Part number	Description
7S0A007FWW	IBM Security Key Lifecycle Manager Basic Edition Install License + SW Subscription & Support 12 Months
7S0A007HWW	IBM Security Key Lifecycle Manager For Raw Decimal Terabyte Storage Resource Value Unit License + SW Subscription & Support 12 Months
7S0A007KWW	IBM Security Key Lifecycle Manager For Raw Decimal Petabyte Storage Resource Value Unit License + SW Subscription & Support 12 Months
7S0A007MWW	IBM Security Key Lifecycle Manager For Usable Decimal Terabyte Storage Resource Value Unit License + SW Subscription & Support 12 Months
7S0A007PWW	IBM Security Key Lifecycle Manager For Usable Decimal Petabyte Storage Resource Value Unit License + SW Subscription & Support 12 Months

Controllers for internal storage

The SR655 V3 offers a variety of controller options for internal drives:

- For 2.5-inch and 3.5-inch drives:
 - Onboard SATA ports (feature AVUX)
 - Onboard NVMe ports (feature BC4V)
 - NVMe switch and retimer adapters (PCIe slot-based)
 - RAID adapters and HBAs for SAS/SATA drives (PCIe slot-based)
 - RAID adapters, SAS Expander, and HBAs for SAS/SATA drives (cabled in a dedicated space)
- For 7mm drive bays in the rear of the server (see the [7mm drives](#) section)
 - SATA controller integrated into the 7mm drive bay enclosure
 - NVMe controller integrated into the 7mm drive bay enclosure
- For M.2 drives internal to the server (see [M.2 drives](#) section)
 - SATA controller integrated on the M.2 SATA 2-Bay RAID Enablement Kit
 - NVMe controller integrated on the M.2 NVMe 2-Bay RAID Enablement Kit

As well as supporting RAID adapters and HBAs that install in a PCIe slot, the SR655 V3 with 2.5-inch front drive bays supports a custom form factor (CFF) adapter that is mounted in the server and cabled to one of the onboard NVMe ports. These Internal Adapters are not supported with 3.5-inch front drives due to a lack of physical space.

The following table lists the adapters used for the internal storage of the server.

Table 34. Internal Storage adapter support

Part number	Feature code	Description	Power module (supercap)	PCIe lanes	Max qty	Slots supported	Windows 10/11 support
Onboard controllers							
CTO only	AVUX	Onboard SATA AHCI Mode	No		1	N/A	Supported
CTO only	BC4V	Non RAID NVMe (Onboard NVMe)	No		1	N/A	Supported
SAS HBA - PCIe Gen 3							
4Y37A72480	BJHH**	ThinkSystem 4350-8i SAS/SATA 12Gb HBA	No	Gen3 x8	4	1 - 6	No
4Y37A72481	BJHJ	ThinkSystem 4350-16i SAS/SATA 12Gb HBA	No	Gen3 x8	2	1 - 6	No
SAS HBA - PCIe Gen 4							
4Y37A78601	BM51	ThinkSystem 440-8i SAS/SATA PCIe Gen4 12Gb HBA	No	Gen4 x8	4	1 - 6	No
4Y37A78602	BM50	ThinkSystem 440-16i SAS/SATA PCIe Gen4 12Gb HBA	No	Gen4 x8	2	1 - 6	No
4Y37A09725	B8P1	ThinkSystem 440-16i SAS/SATA PCIe Gen4 12Gb Internal HBA	No	Gen4 x8	1	Cabled	No
NVMe adapters - PCIe Gen 4							
4C57A65446	B98C	ThinkSystem 4-Port PCIe Gen4 NVMe Retimer Adapter	No	Gen4 x16	3	1,3,2,4	No
4Y37A09737	B8P5	ThinkSystem 1611-8P PCIe Gen4 Switch Adapter	No	Gen4 x16	2	4,5	Supported
CTO only	BGM1	ThinkSystem RAID 940-8i 4GB Flash PCIe Gen4 12Gb Adapter for U.3	No	Gen4 x8	3	1 - 6	Supported
CTO only	BM36	ThinkSystem RAID 940-16i 4GB Flash PCIe Gen4 12Gb Adapter for U.3	No	Gen4 x8	1	1 - 6	Supported

Part number	Feature code	Description	Power module (supercap)	PCIe lanes	Max qty	Slots supported	Windows 10/11 support
CTO only	BDY4	ThinkSystem RAID 940-16i 8GB Flash PCIe Gen4 12Gb Adapter for U.3	No	Gen4 x8	1	1 - 6	Supported
NVMe adapters - PCIe Gen 5							
4TA7A84579	BLKY	ThinkSystem PCIe Gen5 NVMe Retimer Adapter	No	Gen5 x16	3	1,2,4	No
RAID controllers - PCIe Gen 3							
4Y37A72482	BJHK	ThinkSystem RAID 5350-8i PCIe 12Gb Adapter	No	Gen3 x8	4	1 - 6	Supported
4Y37A84028	BRQV	ThinkSystem RAID 5350-8i PCIe 12Gb Internal Adapter	No	Gen3 x8	1	Cabled	Supported
4Y37A72483	BJHL	ThinkSystem RAID 9350-8i 2GB Flash PCIe 12Gb Adapter	Included	Gen3 x8	4	1 - 6	Supported
4Y37A72484	BJHM	ThinkSystem RAID 9350-8i 2GB Flash PCIe 12Gb Internal Adapter	Included	Gen3 x8	1	Cabled	Supported
4Y37A72485	BJHN	ThinkSystem RAID 9350-16i 4GB Flash PCIe 12Gb Adapter	Included	Gen3 x8	2	1 - 6	Supported
4Y37A72486	BJHP**	ThinkSystem RAID 9350-16i 4GB Flash PCIe 12Gb Internal Adapter	Included	Gen3 x8	1	Cabled	Supported
RAID controllers - PCIe Gen 4							
4Y37A78834	BMFT	ThinkSystem RAID 540-8i PCIe Gen4 12Gb Adapter	No	Gen4 x8	4	1 - 6	Supported
4Y37A78835	BNAX	ThinkSystem RAID 540-16i PCIe Gen4 12Gb Adapter	No	Gen4 x8	2	1 - 6	Supported
4Y37A09728	B8NY	ThinkSystem RAID 940-8i 4GB Flash PCIe Gen4 12Gb Adapter	Included	Gen4 x8	4	1 - 6	Supported
4Y37A78600	BM35	ThinkSystem RAID 940-16i 4GB Flash PCIe Gen4 12Gb Adapter	Included	Gen4 x8	2	1 - 6	Supported
4Y37A09730	B8NZ	ThinkSystem RAID 940-16i 8GB Flash PCIe Gen4 12Gb Adapter	Included	Gen4 x8	2	1 - 6	Supported
4Y37A09735	B8P0	ThinkSystem RAID 940-16i 8GB Flash PCIe Gen4 12Gb Internal Adapter	Included	Gen4 x8	1	Cabled	Supported
4Y37A09733	B8P8	ThinkSystem RAID 940-32i 8GB Flash PCIe Gen4 12Gb Adapter	Included	Gen4 x8	1	1 - 6	Supported
SAS expanders							
4Y37A09736	B8P6	ThinkSystem 48 port 12Gb Internal Expander	No	Gen4 x8	1	Cabled	Supported

‡ These custom form factor (CFF) adapters are only supported with 2.5-inch front drive bays. Not supported in configurations with 3.5-inch front drive bays.

† Adapter also supports PCIe 4.0 x1 connectivity to NVMe drives (requires NVMe drives with U.3 interface)

** This adapter is currently not available for CTO orders; it is only available as an option part number for field upgrades

Configuration notes:

- **Supercap support limits the number of RAID adapters installable** : The table lists whether the adapter includes a power module (supercap) to power the flash memory. The server supports between 1 and 4 supercaps depending on the server configuration as described in the [RAID flash power module \(supercap\) support](#) section. The number of supercaps supported also determines the maximum

number of RAID adapters with flash that can be installed in the server.

- **Field upgrades:** If you are adding a RAID adapter with supercap to the server as a field upgrade, you may need a supercap holder as described in the [RAID flash power module \(supercap\) support](#) section.
- **7mm drive support:** The storage adapters listed in the table below do *not* provide connectivity to the 7mm drive bays. The 7mm drives have their own independent RAID controller. See the [7mm drives](#) section for details.
- **E810 Ethernet and X350 RAID/HBAs:** The use of both an Intel E810 network adapter and an X350 HBA/RAID adapter (9350, 5350 and 4350) is supported, however E810 firmware CVL4.3 or later is required. For details, see [Support Tip HT513226](#).

The RAID 940-8i and RAID 940-16i adapters also support NVMe through a feature named Tri-Mode support (or Trimode support). This feature enables the use of NVMe U.3 drives at the same time as SAS and SATA drives. Tri-Mode requires an AnyBay backplane. Cabling of the controller to the backplanes is the same as with SAS/SATA drives, and the NVMe drives are connected via a PCIe x1 link to the controller.

NVMe drives connected using Tri-Mode support provide better performance than SAS or SATA drives: A SATA SSD has a data rate of 6Gbps, a SAS SSD has a data rate of 12Gbps, whereas an NVMe U.3 Gen 4 SSD with a PCIe x1 link will have a data rate of 16Gbps. NVMe drives typically also have lower latency and higher IOPS compared to SAS and SATA drives. Tri-Mode is supported with U.3 NVMe drives and requires an AnyBay backplane.

Tri-Mode requires U.3 drives: Only NVMe drives with a U.3 interface are supported. U.2 drives are not supported. See the [Internal drive options](#) section for the U.3 drives supported by the server.

The onboard SATA controller has the following features:

- Controller integrated into the AMD processor
- JBOD only; no RAID support
- Supports up to 16 SATA drives in the SR655 V3
- Supports HDDs and SSDs; can be mixed

The onboard NVMe support has the following features:

- Controller integrated into the AMD processor
- Supports up to 12 NVMe drives direct connected to onboard ports; additional drives through retimer/switch adapters
- Each drive has PCIe 5.0 x4 host interface
- Supports JBOD
- No support for RAID

For specifications about the RAID adapters and HBAs supported by the SR655 V3, see the ThinkSystem RAID Adapter and HBA Reference, available from:

<https://lenovopress.lenovo.com/lp1288-thinksystem-raid-adapter-and-hba-reference#sr655-v3-support=SR655%2520V3>

For more information about each of the adapters, see the product guides in the RAID adapters or HBA sections of the Lenovo Press web site:

<https://lenovopress.com/servers/options/raid>

<https://lenovopress.com/servers/options/hba>

Internal drive options

The following tables list the drive options for internal storage of the server.

2.5-inch hot-swap drives:

- [2.5-inch hot-swap 12 Gb SAS HDDs](#)
- [2.5-inch hot-swap 24 Gb SAS SSDs](#)
- [2.5-inch hot-swap 12 Gb SAS SSDs](#)
- [2.5-inch hot-swap 6 Gb SATA SSDs](#)
- [2.5-inch hot-swap PCIe 5.0 NVMe SSDs](#)
- [2.5-inch hot-swap PCIe 4.0 NVMe SSDs](#)

2.5-inch 7mm hot-swap drives:

- [7mm 2.5-inch hot-swap 6 Gb SATA SSDs](#)
- [7mm 2.5-inch hot-swap PCIe 4.0 NVMe SSDs](#)

3.5-inch hot-swap drives:

- [3.5-inch hot-swap 12 Gb SAS HDDs](#)
- [3.5-inch hot-swap 6 Gb SATA HDDs](#)
- [3.5-inch hot-swap 24 Gb SAS SSDs](#)
- [3.5-inch hot-swap 12 Gb SAS SSDs](#)
- [3.5-inch hot-swap 6 Gb SATA SSDs](#)
- [3.5-inch hot-swap PCIe 4.0 NVMe SSDs](#)

M.2 drives:

- [M.2 SATA drives](#)
- [M.2 PCIe 4.0 NVMe drives](#)

M.2 drive support: The use of M.2 drives requires an additional adapter as described in the [M.2 drives](#) subsection.

SED support: The tables include a column to indicate which drives support SED encryption. The encryption functionality can be disabled if needed. Note: Not all SED-enabled drives have "SED" in the description.

Table 35. 2.5-inch hot-swap 12 Gb SAS HDDs

Part number	Feature code	Description	SED support	Max Qty
2.5-inch hot-swap HDDs - 12 Gb SAS 15K				
7XB7A00021	AULV	ThinkSystem 2.5" 300GB 15K SAS 12Gb Hot Swap 512n HDD	No	40

USB flash drive

For general portable storage needs, the server also supports the USB flash drive option that is listed in the following table.

Table 51. USB memory key

Part number	Feature	Description
4X77A77065	BNWN	ThinkSystem USB 32GB USB 3.0 Flash Drive

Internal backup units

The server does not supports any internal backup units, such as tape drives or RDX drives. External backup units are available as described in the [External backup units](#) section.

Optical drives

The server supports the external USB optical drive listed in the following table.

Table 52. External optical drive

Part number	Feature code	Description
7XA7A05926	AVV8	ThinkSystem External USB DVD RW Optical Disk Drive

The drive is based on the Lenovo Slim DVD Burner DB65 drive and supports the following formats: DVD-RAM, DVD-RW, DVD+RW, DVD+R, DVD-R, DVD-ROM, DVD-R DL, CD-RW, CD-R, CD-ROM.

I/O expansion

The server supports up to 10x total PCIe slots, plus a slot dedicated to the OCP adapter (rear or front). The 10x slots are either 10x rear-facing slots, or a combination of 6x rear + 2x front PCIe slots.

The server also offers a dedicated OCP 3.0 SFF slot for networking, located either at the rear or front of the server. Slot availability is based on riser selection.

Topics in this section:

- [Slot layout and connections](#)
- [Ordering information](#)
- [Serial port](#)

Slot layout and connections

The slots at the rear are provided by riser cards as follows:

- Riser 1: Slots 1, 2 and 3, all full-height slots
- Riser 2: Slots 4, 5, and 6, all full-height slots
- Riser 3: Slot 7 and 8
 - Without Riser 4: both full-height slots
 - With Riser 4: both low-profile slots
- Riser 4: Slots 9 and 10, both low-profile slots

The slots in each riser are either PCIe x16 or PCIe x8 depending on the riser card selected as listed in the table below. All x8 slots are open-ended and physically support x16 adapters. Depending on the risers selected, slots are either PCIe 5.0 or PCIe 4.0. OCP slot is PCIe 4.0 x16.

The SR655 V3 also supports front-accessible PCIe slots: two PCIe 4.0 or PCIe 5.0 x16 slots plus a dedicated OCP 3.0 SFF slot for networking. When front slots are used, rear slots 7-10 (Riser 3 & Riser 4) are not available as they use the same connectors. Front-accessible slots are as follows:

- Slot 11: full-height half-length FHHL slot
- Slot 12: full-height half-length FHHL slot

Onboard NVMe support: When Riser 3 (or Riser 3+4) is configured, only 4 NVMe drives can be connected using onboard NVMe connectors.

As discussed in the [Internal storage](#) section, the server supports drive bays in the rear of the server. Depending on the drive bays selected, the number of slots available for adapters is reduced. The figure below shows the supported combinations of slots and drive bays.

Internal HBA/RAID adapter: For configurations with 2.5-inch front drive bays, an internal RAID adapter or HBA can be installed in a dedicated space and cabled to a PCIe x8 connector, thereby freeing up a slot for other purposes.

The following figure shows the locations of the rear-accessible slots for each configuration selection. The OCP slot is located in the lower-left corner.

Figure 15. SR655 V3 rear slot configurations

The following figure shows the locations of the front-accessible slots.

Figure 16. SR655 V3 front slots

Ordering information

The following table lists the riser cards available for CTO builds and for field upgrades.

No slots: It is also possible to build a configuration without any slots, in which case slot fillers will be derived in the configurator. Slots can be added later as field upgrades using option part numbers as listed in the table.

Table 53. Riser cards

Part number	Feature code	Description	Slot configuration* (Green = Gen5, Blue = Gen4)				Purpose
			Slot 1	Slot 2	Slot 3		
Rear Riser 1 (FH slots)			Slot 1	Slot 2	Slot 3

	BTMS†	ThinkSystem V3 2U PCIe Gen5 Riser 3/4-part 2 for Rear 10 slots (Gen4)			Gen4 x8	Gen4 x8	2x PCIe 4.0 x8 slots
Front Riser			Slot 11	Slot 12			
CTO only	BQ2X	ThinkSystem V3 2U Front x16/x16 PCIe G4 Riser	Gen4 x16	Gen4 x16			2x PCIe 4.0 x16 front-accessible slots
CTO only	C1PN‡	ThinkSystem V3 2U 2X16 Front PCIe Gen5 Riser	Gen5 x16	Gen5 x16			2x PCIe 5.0 x16 front-accessible slots

* All PCIe x8 slots are open ended and will physically support x16 adapters

† In the configurator, when feature BQ2W is selected, BTMS is automatically derived and provides slots 9 & 10. 4XH7A87546 contains both risers. Note that in the SR655 V3, risers BQ2W and BTMS supply Gen4 slots, not Gen5, even though the feature codes are named "Gen5".

‡ Front Gen5 riser (feature C1PN) is currently only supported with 5th Gen ("Turin") processors. Support for 4th Gen processors planned for 1Q/2025

Configuration rules:

- For best performance, install PCIe 5.0 adapters in PCIe 5.0 (Gen5) slots
- The server only supports one OCP slot, either in the rear of the server or the front of the server, not both
- Front slots are supported only with rear slots in Riser 1 and 2. Front slots cannot be used in combination with Riser 3 (or Riser 4) as they use the same connectors.
- If you want to configure 4x low profile slots for slots 7-10, select feature BQ2W which provides riser 3 (slots 7, 8). Feature BTMS will then be automatically derived to provide riser 4 (slots 9 & 10), along with the necessary cables. Option part number 4XH7A87546 contains both of these risers and the cables.
- If you want to add both a 7mm drive enclosure plus 2x PCIe slots above it, you will need to order the 7mm drive option (either 4XH7A85898 or 4XH7A85899) plus the x16/x16/E riser kit (4XH7A82900 for PCIe Gen 5 or 4XH7A82892 for Gen 4). The riser kit part number provides the 2-slot riser card.
- All PCIe x8 slots are open ended and will physically support x16 adapters
- To support Riser 3 (or Riser 3+4), the following must both apply:

- No rear drives are configured
- If the Onboard NVMe ports are used, then no more than 4 NVMe or AnyBay drive bays are configured (eg a 3.5-inch backplane of 8x SAS/SATA + 4x AnyBay is supported, or a 2.5-inch backplane of 6x SAS/SATA + 2x AnyBay is supported)

Serial port

The SR655 V3 optionally supports a RS-232 serial port by adding a COM port bracket to either slot 3 or slot 6. Ordering information is shown in the following table.

Front PCIe slots: The serial port is not supported in the front PCIe slots

Table 54. Serial port

Part number	Feature code	Description
4X97A82921	BMNJ	ThinkSystem V2/V3 1U COM Port Upgrade Kit

The bracket is shown in the following figure. The option part number includes both Low Profile and Full Height brackets.

Figure 17. ThinkSystem COM Port Upgrade Kit v2

Network adapters

The server has a dedicated OCP 3.0 SFF slot with PCIe 4.0 x16 host interface. See [Figure 3](#) for the location of the OCP slot.

The following table lists the supported OCP adapters. One port can optionally be shared with the XCC management processor for Wake-on-LAN and NC-SI support. Only 1 OCP card can be installed in the server, either rear-accessible or front-accessible.

Table 55. Supported OCP adapters

Part number	Feature code	Description	Maximum supported	Windows 10/11 support

For more information, including the transceivers and cables that each adapter supports, see the list of Lenovo Press Product Guides in the Networking adapters category:

<https://lenovopress.com/servers/options/ethernet>

Configuration requirements:

- Adapters with a x16 host interface require a x16 slot to maximize performance
- PCIe Gen5 adapters will require a Gen5 riser to maximize performance
- **E810 Ethernet and X350 RAID/HBAs**: The use of both an Intel E810 network adapter and an X350 HBA/RAID adapter (9350, 5350 and 4350) is supported, however E810 firmware CVL4.3 or later is required. For details, see [Support Tip HT513226](#).

Fibre Channel host bus adapters

The following table lists the Fibre Channel HBAs supported by the SR655 V3.

No Windows 10/11 support: None of the adapters listed in the table are supported with Windows 10 or Windows 11.

Table 57. Fibre Channel HBAs

Part number	Feature code	Description	PCIe lanes	Max qty	Slots supported
64 Gb Fibre Channel HBAs					
4XC7A77485	BLC1	ThinkSystem Emulex LPe36002 64Gb 2-port PCIe Fibre Channel Adapter	Gen4 x8	10	1-12
32 Gb Fibre Channel HBAs					
4XC7A76498	BJ3G	ThinkSystem Emulex LPe35000 32Gb 1-port PCIe Fibre Channel Adapter v2	Gen4 x8	10	1-12
4XC7A76525	BJ3H	ThinkSystem Emulex LPe35002 32Gb 2-port PCIe Fibre Channel Adapter V2	Gen4 x8	10	1-12
4XC7A08279	BA1G	ThinkSystem QLogic QLE2770 32Gb 1-Port PCIe Fibre Channel Adapter	Gen4 x8	10	1-12

01CV830	ATZU	Emulex 16Gb Gen6 FC Single-port HBA	Gen3 x8	10	1-12
01CV760	ATZC	QLogic 16Gb Enhanced Gen5 FC Dual-port HBA	Gen3 x8	10	1-12
01CV750	ATZB	QLogic 16Gb Enhanced Gen5 FC Single-port HBA	Gen3 x8	10	1-12

For more information, see the list of Lenovo Press Product Guides in the Host bus adapters category:
<https://lenovopress.com/servers/options/hba>

SAS adapters for external storage

The following table lists SAS HBAs and RAID adapters supported by SR655 V3 server for use with external storage.

No Windows 10/11 support: None of the adapters listed in the table are supported with Windows 10 or Windows 11.

Table 58. Adapters for external storage

Part number	Feature code	Description	PCIe lanes	Max qty	Slots supported
SAS HBAs					
4Y37A09724	B8P7	ThinkSystem 440-16e SAS/SATA PCIe Gen4 12Gb HBA	Gen4 x8	10	1-10
4Y37A78837	BNWK	ThinkSystem 440-8e SAS/SATA PCIe Gen4 12Gb HBA	Gen4 x8	10	1-10
External RAID adapters					
4Y37A78836	BNWJ	ThinkSystem RAID 940-8e 4GB Flash PCIe Gen4 12Gb Adapter	Gen4 x8	4	1-10

* See below regarding supercap requirements

For a comparison of the functions of the supported storage adapters, see the ThinkSystem RAID Adapter and HBA Reference:

<https://lenovopress.lenovo.com/lp1288#sr655-v3-support=SR655%2520V3&internal-or-external-ports=External>

The RAID 940-8e uses a flash power module (supercap), which can be installed in one of up to four locations in the server depending on the server configuration. See the [RAID flash power module \(supercap\) support](#) section for details. The number of 940-8e RAID adapters supported is based on how many supercaps can be installed in the server. If an internal RAID adapter with flash power modules is installed, the maximum number of 940-8e adapters supported is reduced by 1.

For more information, see the list of Lenovo Press Product Guides in the Host bus adapters and RAID adapters categories:

<https://lenovopress.com/servers/options/hba>
<https://lenovopress.com/servers/options/raid>

Flash storage adapters

The SR655 V3 currently does not support PCIe Flash Storage adapters.

GPU adapters

This section describes the supported GPUs.

- [GPU part numbers](#)
- [Riser selections for double-wide GPUs](#)
- [GPU Enablement Kit](#)
- [GPU cable kits](#)

GPU part numbers

The SR655 V3 supports the following graphics processing units (GPUs).

Table 59. Supported GPUs

Part number	Feature code	Description	TDP	Aux power	PCIe lanes	Max qty	Slots supported*	Windows 10/11 support
Single-wide GPUs								
4X67A84824	BS2C	ThinkSystem NVIDIA L4 24GB PCIe Gen4 Passive GPU	72W	No	Gen4 x16	5	1,2,4,5,7,11,12	Supported
4X67A81547	BP05	ThinkSystem NVIDIA A2 16GB PCIe Gen4 Passive GPU w/o CEC	60W	No	Gen4 x8	8	All FH slots	Supported

4X67A76581	BJHG	ThinkSystem NVIDIA A30 24GB PCIe Gen4 Passive GPU w/o CEC	165W	Yes	Gen4 x16	3	2, 5, 7*	Supported
CTO only	BQZR	ThinkSystem NVIDIA A30 24GB PCIe Gen4 Passive GPU w/o CEC	165W	Yes	Gen4 x16	3	2, 5, 7*	Supported
4X67A76727	BNFE	ThinkSystem NVIDIA A16 64GB Gen4 PCIe Passive GPU	250W	Yes	Gen4 x16	3	2, 5, 7*	Supported
CTO only	BQZU	ThinkSystem NVIDIA A16 64GB Gen4 PCIe Passive GPU w/o CEC	250W	Yes	Gen4 x16	3	2, 5, 7*	Supported
4X67A89324	C2DP	ThinkSystem NVIDIA RTX 6000 Ada 48GB PCIe Active GPU	300W	Yes	Gen4 x16	3	2, 5, 7*	Supported
4X67A96491	C4RX	ThinkSystem NVIDIA RTX 4500 Ada 24GB PCIe Active GPU	200W	Yes	Gen4 x16	3	2, 5, 7*	Supported
4X67A76720	BMT9	ThinkSystem NVIDIA RTX A2000 12GB PCIe Active GPU	70W	Yes	Gen4 x16	3	2, 5, 7*	Supported

* When a double-wide GPU is installed in slot 2, 5 or 7, the adjacent slot 1, 4 and 8 respectively is not available

For information about these GPUs, see the ThinkSystem GPU Summary, available at: <https://lenovopress.com/lp0768-thinksystem-thinkagile-gpu-summary>

For CTO orders, the SR655 V3 also supports the selection of a placeholder for a GPU. This selection results in a "GPU ready" configuration which ensures that the server ships with the components needed for GPU installation (GPU power cables, air ducts, power supplies, fans, etc) without actually including the GPUs themselves. The following table lists the ordering information for CTO orders.

Table 60. GPU-Ready configurations - ordering information

Part number	Feature code	Description
CTO only	BW40	ThinkSystem NVIDIA A4500 GPU-Ready Installation
CTO only	BVLL	ThinkSystem NVIDIA H100 GPU-Ready Installation
CTO only	BZUS	ThinkSystem NVIDIA L40S GPU-Ready Installation
CTO only	BP4X	ThinkSystem DW GPU-Ready Installation (for all other supported DW GPUs)

Configuration rules

The following configuration requirements must be met when installing GPUs:

- Some NVIDIA A Series GPUs are available as two feature codes, one with a CEC chip and one without a CEC chip (ones without the CEC chip have "w/o CEC" in the name). The CEC is a secondary Hardware Root of Trust (RoT) module that provides an additional layer of security, which can be used by customers who have high regulatory requirements or high security standards. NVIDIA uses a multi-layered security model and hence the protection offered by the primary Root of Trust embedded in the GPU is expected to be sufficient for most customers. The CEC defeatured products still offer Secure Boot, Secure Firmware Update, Firmware Rollback Protection, and In-Band Firmware Update Disable. Specifically, without the CEC chip, the GPU does not support Key Revocation or Firmware Attestation. CEC and non-CEC GPUs of the same type of GPU can be mixed in field upgrades.
- All GPUs installed must be identical
- When a double-wide GPU is installed in slot 2, 5 or 7, the adjacent slot 1, 4 and 8 respectively is not available
- Flash storage adapters are not supported.
- Middle drive bays and Rear drive bays are not supported
- GPUs are not supported with CPUs with a TDP of more than 300W

For additional requirements related to GPUs, see the GPU Configuration section of the Thermal Rules page in the Information Center:

https://pubs.lenovo.com/sr655-v3/thermal_rules

Riser selections for double-wide GPUs

When a double-wide GPU is installed in slot 2, 5 or 7, the adjacent slot 1, 4 and 8 respectively is not available. The riser cards listed in the following table are used with double-wide GPUs.

Table 61. Risers needed for double-wide GPUs

Riser	Part number	Feature code	Description
PCIe Gen 5 slots			
Riser 1 (GPU in slot 2)	4XH7A82902	BPQW	ThinkSystem V3 2U E/x16/x16 PCIe Gen5 Riser 1/2 Option Kit
Riser 2 (GPU in slot 5)	4XH7A82902	BPQW	ThinkSystem V3 2U E/x16/x16 PCIe Gen5 Riser 1/2 Option Kit
Riser 3 (GPU in slot 7)	4XH7A86399	BLL9	ThinkSystem SR655 V3 x16/x16 PCIe G5 Riser3 Option Kit
PCIe Gen 4 slots			
Riser 1 (GPU in slot 2)	4XH7A82894	BLKN	ThinkSystem V3 2U E/x16/x16 PCIe Gen4 Riser 1/2 Option Kit
Riser 2 (GPU in slot 5)	4XH7A82894	BLKN	ThinkSystem V3 2U E/x16/x16 PCIe Gen4 Riser 1/2 Option Kit
Riser 3 (GPU in slot 7)	4XH7A86397	BPKG	ThinkSystem SR655 V3 x16/x16 PCIe G4 Riser3 Option Kit

GPU Enablement Kit

When installing any full-length GPU as a field upgrade, you will also need to order the GPU Enablement Kit as listed in the following table. This kit is not required for the NVIDIA A2 GPU.

Table 62. ThinkSystem SR655 V3 GPU Enablement Kit

Part number	Description	Maximum supported
4X67A86438	ThinkSystem SR655 V3 GPU Enablement Kit (for double-wide GPUs) <ul style="list-style-type: none"> ● 1x 2U performance heatsink ● 1x ThinkSystem 2U GPU air duct ● 3x GPU extension air ducts ● 3x Air duct fillers ● 3x GPU power cables for single-wide GPUs (SBB7A44786) ● 3x GPU power Y-cables when 2x single-wide GPUs installed on one riser (SBB7A23757) ● 3x 8-pin GPU power cables for double-wide GPUs (SBB7A49792) ● 3x 16-pin GPU power cables for double-wide GPUs (SBB7A66338) 	1

The following figure shows the GPU air duct with GPU air duct fillers and GPU extend air ducts installed. Note that the drawings might not 100% reflect the shipping components.

Figure 18. SR655 V3 GPU air duct

GPU cable kits

The following cable kits are offered to provide auxiliary power cables for GPUs that require one. See the [Supported GPUs table](#) to see which GPUs require an auxiliary power cable.

Configuration notes:

- This cable kits are only required for field upgrades; factory (CTO) orders will automatically include any required cables.
- For double-wide GPUs, The DW (double-wide) cable kit is only required if you are adding *additional* double-wide GPUs to a server that already has a DW GPU installed from a CTO order. If you are doing a field upgrade to install the *first* DW GPU to a server, order the ThinkSystem SR655 V3 GPU Enablement Kit, 4X67A86438 instead, since the Enablement Kit includes the necessary power cables.
- The SW (single-wide) cable kit is required if you are doing any field upgrades to add a single-wide GPU that requires an auxiliary power cable (GPU power > 75 W), however, all currently supported GPUs do *not* require auxiliary power cables.

Table 63. GPU cable kits

Part number	Description
4X97A86165	ThinkSystem SR665 V3/SR655 V3 DW GPU Cable Option Kit <ul style="list-style-type: none"> • 3x 16-pin GPU power cables for H100 GPUs (SBB7A66338) • 3x GPU power cables RTX A4500 (SBB7A44786) • 3x 8-pin GPU power cables for all other double-wide GPU (SBB7A49792)
4X97A86166	ThinkSystem SR665 V3/SR655 V3 SW GPU Cable Option Kit <ul style="list-style-type: none"> • 3x Power cables for SW GPUs and the RTX A4500 (SBB7A44786) • 3x Power Y-cable when 2x single-wide GPUs installed on one riser (SBB7A23757)

Cooling

The SR655 V3 server has up to six 60 mm hot-swap variable-speed fans. The server offers N+1 redundancy. The server also has one or two additional fans integrated in each of the two power supplies. Most configurations require 6 system fans. If Riser 3 is not configured, then only 4 system fans are needed.

Depending on the configuration, the server will need either Standard fans (single-rotor 17K RPM) or Performance fans (dual-rotor 21K RPM).

Under all of the following conditions, standard fans can be used:

- CPU with TDP ≤ 240W
- No GPUs
- No 100GbE or higher network adapters
- No 3DS RDIMMs
- Front drive bays not 12x 3.5-inch
- No mid-chassis drive bays
- No rear drive bays

If any conditions are not met, Performance fans are required.

Ordering information for the fans is listed in the following table.

Table 64. Fan ordering information

Part number	Feature code	Description	Quantity required
4F17A14497	BH8F	ThinkSystem V3 2U Standard Fan Option Kit	4 or 6*
4F17A82884	BLL6	ThinkSystem V3 2U Performance Fan Option Kit	4 or 6*

* 6 fans required if Riser 3 is configured

Power supplies

The SR655 V3 supports up to two redundant hot-swap power supplies.

The power supply choices are listed in the following table. Both power supplies used in server must be identical.

Tip: When configuring a server in the DCSC configurator, power consumption is calculated precisely by interfacing with Lenovo Capacity Planner. You can therefore select the appropriate power supply for your configuration. However, do consider future upgrades that may require additional power needs.

Table 65. Power supply options

Part number	Feature code	Description	Connector	Max quantity	110V AC	220V AC	240V DC PRC only	-48V DC
AC input power - 80 PLUS Titanium efficiency								
4P57A82019	BR1X	ThinkSystem 750W 230V Titanium Hot-Swap Gen2 Power Supply v3	C13	2	No	Yes	Yes	No
CTO only	C07V	ThinkSystem 750W 230V Titanium Hot-Swap Gen2 Power Supply v4	C13	2	No	Yes	Yes	No
4P57A72666	BLKH	ThinkSystem 1100W 230V Titanium Hot-Swap Gen2 Power Supply	C13	2	No	Yes	Yes	No
4P57A78359	BPK9	ThinkSystem 1800W 230V Titanium Hot-Swap Gen2 Power Supply	C13	2	No	Yes	Yes	No
4P57A72667	BKTJ	ThinkSystem 2600W 230V Titanium Hot-Swap Gen2 Power Supply v4	C19	2	No	Yes	Yes	No
AC input power - 80 PLUS Platinum efficiency								
4P57A72670	BNFG	ThinkSystem 750W 230V/115V Platinum Hot-Swap Gen2 Power Supply v3	C13	2	Yes	Yes	Yes	No
4P57A72671	BNFH	ThinkSystem 1100W 230V/115V Platinum Hot-Swap Gen2 Power Supply v3	C13	2	Yes	Yes	Yes	No
4P57A26294	BMUF	ThinkSystem 1800W 230V Platinum Hot-Swap Gen2 Power Supply v2	C13	2	No	Yes	Yes	No
4P57A26295	B962	ThinkSystem 2400W 230V Platinum Hot-Swap Gen2 Power Supply	C19	2	No	Yes	Yes	No
-48V DC input power								
4P57A26296	B8QE	ThinkSystem 1100W -48V DC Hot-Swap Gen2 Power Supply	DC	2	No	No	No	Yes

Supported power supplies are auto-sensing dual-voltage units, supporting both 110V AC (100-127V 50/60 Hz) and 220V AC (200-240V 50/60 Hz) power. For China customers, all power supplies support 240V DC.

AC power supplies up to 1800W have a C14 connector. AC power supplies 2400W and above have a C19 connector.

The supported -48V DC power supply has a Weidmuller TOP 4GS/3 7.6 terminal as shown in the following figure.

Figure 19. Connector on the ThinkSystem 1100W -48V DC Hot-Swap Gen2 Power Supply

Power supply options do not include a line cord. For server configurations, the inclusion of a power cord is model dependent. Configure-to-order models can be configured without power cords if desired.

Power supply LEDs

The supported hot-swap power supplies have the following LEDs:

- Power input LED:
 - Green: The power supply is connected to the AC power source
 - Off: The power supply is disconnected from the AC power source or a power problem has occurred
- Power output LED:
 - Green: The server is on and the power supply is working normally
 - Blinking green: The power supply is in Zero-output/Standby mode (see below)
 - Off: The server is powered off, or the power supply is not working properly
- Power supply error LED:
 - Off: The power supply is working normally
 - Yellow: The power supply has failed

Zero-output mode: When Zero-output mode (also known as Standby mode or Cold Redundancy mode) is configured in XCC and the server power load is sufficiently low, one of the installed power supplies enters into the Standby state while the other one delivers entire load. When the power load increases, the standby power supply will switch to Active state to provide sufficient power to the server. Zero-output mode can be enabled or disabled in the XClarity Controller web interface, Server Configuration > Power Policy. If you select Disable, then both power supplies will be in the Active state.

Power cords

Line cords and rack power cables with C13 connectors can be ordered as listed in the following table.

110V customers: If you plan to use the 1100W power supply with a 110V power source, select a power cable that is rated above 10A. Power cables that are rated at 10A or below are not supported with 110V power.

Table 66. Power cords

Part number	Feature code	Description

-48V DC power cord

For the -48V DC Power Supply, the following power cable is supported.

Table 68. -48V DC power cable

Part number	Feature code	Description
4X97A59831	BE4V	2.5m, -48VDC Interconnecting Cable

Systems management

The SR655 V3 contains an integrated service processor, XClarity Controller 2 (XCC), which provides advanced control, monitoring, and alerting functions. The XCC2 is based on the AST2600 baseboard management controller (BMC) using a dual-core ARM Cortex A7 32-bit RISC service processor running at 1.2 GHz.

Topics in this section:

- [System I/O Board](#)
- [Local management](#)
- [System status with XClarity Mobile](#)
- [Remote management](#)
- [XCC2 Platinum](#)
- [Lenovo XClarity Provisioning Manager](#)
- [Lenovo XClarity Administrator](#)
- [Lenovo XClarity Integrators](#)
- [Lenovo XClarity Essentials](#)
- [Lenovo XClarity Energy Manager](#)
- [Lenovo Capacity Planner](#)

System I/O Board

The SR655 V3 implements a separate System I/O Board that connects to the Processor Board. The location of the System I/O Board is shown in the [Components and connectors](#) section. The System I/O Board contains all the connectors visible at the rear of the server as shown in the following figure.

Figure 20. System I/O Board

The board also has the following components:

- XClarity Controller 2, implemented using the ASPEED AST2600 baseboard management controller (BMC).
- Root of Trust (RoT) module - a daughter card that implements Platform Firmware Resiliency (PFR) hardware Root of Trust (RoT) which enables the server to be NIST SP800-193 compliant. For more

details about PFR, see the [Security](#) section.

- Connector to enable an additional redundant Ethernet connection to the XCC2 controller. The connector is used in conjunction with the ThinkSystem V3 Management NIC Adapter Kit (4XC7A85319). For details, see the [Remote management](#) section.
- Internal USB port - to allow the booting of an operating system from a USB key. The VMware ESXi preloads use this port for example. Preloads are described in the [Operating system support](#) section.
- MicroSD card port to enable the use of a MicroSD card for additional storage for use with the XCC2 controller. XCC2 can use the storage as a Remote Disc on Card (RDOC) device (up to 4GB of storage). It can also be used to store firmware updates (including N-1 firmware history) for ease of deployment.

Tip: Without a MicroSD card installed, the XCC2 controller will have 100MB of available RDOC storage.

Ordering information for the supported USB drive and Micro SD card are listed in the following table.

Table 69. Media for use with the System I/O Board

Part number	Feature code	Description
4X77A77065	BNWN	ThinkSystem USB 32GB USB 3.0 Flash Drive
4X77A77064	BNWP	ThinkSystem MicroSD 32GB Class 10 Flash Memory Card
4X77A92672	C0BC	ThinkSystem MicroSD 64GB Class 10 Flash Memory Card

Local management

The SR655 V3 offers a front operator panel with key LED status indicators, as shown in the following figure.

Tip: The Network LED only shows network activity of the installed OCP network adapter.

Figure 21. Front operator controls are on the left and right side of the server

Light path diagnostics

The server offers light path diagnostics. If an environmental condition exceeds a threshold or if a system component fails, XCC lights LEDs inside the server to help you diagnose the problem and find the failing part. The server has fault LEDs next to the following components:

- Each memory DIMM
- Each drive bay
- Each power supply

Front VGA and External Diagnostics ports

The VGA port at the rear of the server is included in all models, however the VGA port at the front of the server is optional. Also optional is the External Diagnostics port which enables the use of the External Diagnostics Handset.

To configure either the VGA port or the External Diagnostics port at the front of the server, select one of the following feature codes when configuring the server.

Table 70. Front VGA port

Part number	Feature code	Description	Front VGA port	External diagnostics port
CTO only	BQQ2	ThinkSystem 2U V3 EIA Latch Standard	No	No
4XH7A86164	BQQ1	ThinkSystem V3 2U EIA Latch with VGA & External Diagnostics Ports	Included	Included
4XH7A86816	BQQ4	ThinkSystem SR665 V3 EIA Latch with External Diagnostics Port	No	Included
4XH7A86817	BQQ3	ThinkSystem SR665 V3 EIA Latch with VGA Port	Included	No

External Diagnostics Handset

The SR665 V3 optionally has a port to connect an External Diagnostics Handset as described in the preceding section. The External Diagnostics Handset has the same functions as the Integrated Diagnostics Panel but has the advantages of not consuming space on the front of the server plus it can be shared among many servers in your data center. The handset has a magnet on the back of it to allow you to easily mount it on a convenient place on any rack cabinet.

Figure 22. External Diagnostics Handset

Ordering information for the External Diagnostics Handset with is listed in the following table.

Table 71. External Diagnostics Handset ordering information

Part number	Feature code	Description
4TA7A64874	BEUX	ThinkSystem External Diagnostics Handset

Integrated Diagnostics Panel for 8x 2.5-inch and 16x 2.5-inch drive bay configurations

For configurations with 8x 2.5-inch or 16x 2.5-inch drive bays at the front, the server can optionally be configured to have a pull-out Integrated Diagnostics Panel. The following figure shows the standard (fixed) operator panel and the optional Integrated Diagnostics Panel.

Figure 23. Operator panel choices for the 8x 2.5-inch drive bay configuration

The Integrated Diagnostics Panel allows quick access to system status, firmware, network, and health information. The LCD display on the panel and the function buttons give you access to the following information:

- Active alerts
- Status Dashboard
- System VPD: machine type & mode, serial number, UUID string
- System firmware levels: UEFI and XCC firmware
- XCC network information: hostname, MAC address, IP address, DNS addresses
- Environmental data: Ambient temperature, CPU temperature, AC input voltage, estimated power consumption
- Active XCC sessions
- System reset action

The Integrated Diagnostics Panel can be configured as listed in the following table. It is only available configure-to-order (CTO); not available as a field upgrade.

Table 72. Ordering information for the Integrated Diagnostics Panel

Part number	Feature code	Description
CTO only	BMJA	ThinkSystem 2U 16x2.5" Front Operator Panel v2

Information pull-out tab

The front of the server also houses an information pull-out tab (also known as the network access tag). See [Figure 2](#) for the location. A label on the tab shows the network information (MAC address and other data) to remotely access the service processor.

System status with XClarity Mobile

The XClarity Mobile app includes a tethering function where you can connect your Android or iOS device to the server via USB to see the status of the server.

The steps to connect the mobile device are as follows:

1. Enable USB Management on the server, by holding down the ID button for 3 seconds (or pressing the dedicated USB management button if one is present)
2. Connect the mobile device via a USB cable to the server's USB port with the management symbol 
3. In iOS or Android settings, enable Personal Hotspot or USB Tethering
4. Launch the Lenovo XClarity Mobile app

Once connected you can see the following information:

- Server status including error logs (read only, no login required)
- Server management functions (XClarity login credentials required)

Remote management

The server offers a dedicated RJ45 port at the rear of the server for remote management via the XClarity Controller management processor. The port supports 10/100/1000 Mbps speeds.

Remote server management is provided through industry-standard interfaces:

- Intelligent Platform Management Interface (IPMI) Version 2.0
- Simple Network Management Protocol (SNMP) Version 3 (no SET commands; no SNMP v1)
- Common Information Model (CIM-XML)
- Representational State Transfer (REST) support
- Redfish support (DMTF compliant)
- Web browser - HTML 5-based browser interface (Java and ActiveX not required) using a responsive design (content optimized for device being used - laptop, tablet, phone) with NLS support

The SR655 V3 also supports the use of an OCP adapter that provides an additional redundant Ethernet connection to the XCC2 controller. Ordering information is listed in the following table.

Table 73. Redundant System Management Port Adapter

Part number	Feature code	Description	Maximum quantity
4XC7A85319	BTMQ	ThinkSystem V3 Management NIC Adapter Kit	1

The use of this adapter allows concurrent remote access using both the connection on the adapter and the onboard RJ45 remote management port provided by the server. The adapter and onboard port have separate IP addresses.

Configuration rules:

- The Redundant System Management Port Adapter is installed in the OCP adapter slot at the rear of the server and is mutually exclusive with any OCP network adapter.
- It is not supported installed in the front OCP slot (if the front OCP slot is configured)

- If the Redundant System Management Port Adapter is installed in the rear slot, then the front OCP slot (if configured) cannot be used.

The following figure shows the server with the Redundant System Management Port Adapter installed in the OCP slot.

Figure 24. SR655 V3 with the Redundant System Management Port Adapter installed

IPMI via the Ethernet port (IPMI over LAN) is supported, however it is disabled by default. For CTO orders you can specify whether you want to the feature enabled or disabled in the factory, using the feature codes listed in the following table.

Table 74. IPMI-over-LAN settings

Feature code	Description
B7XZ	Disable IPMI-over-LAN (default)
B7Y0	Enable IPMI-over-LAN

XCC2 Platinum

The XCC2 service processor in the SR655 V3 supports an upgrade to the Platinum level of features. Compared to the XCC functions of ThinkSystem V2 and earlier systems, Platinum adds the same features as Enterprise and Advanced levels in ThinkSystem V2, plus additional features.

XCC2 Platinum adds the following Enterprise and Advanced functions:

- Remotely viewing video with graphics resolutions up to 1600x1200 at 75 Hz with up to 23 bits per pixel, regardless of the system state
- Remotely accessing the server using the keyboard and mouse from a remote client
- International keyboard mapping support
- Syslog alerting
- Redirecting serial console via SSH
- Component replacement log (Maintenance History log)
- Access restriction (IP address blocking)
- Lenovo SED security key management
- Displaying graphics for real-time and historical power usage data and temperature
- Boot video capture and crash video capture
- Virtual console collaboration - Ability for up to 6 remote users to be log into the remote session simultaneously
- Remote console Java client

- Mapping the ISO and image files located on the local client as virtual drives for use by the server
- Mounting the remote ISO and image files via HTTPS, SFTP, CIFS, and NFS
- System utilization data and graphic view
- Single sign on with Lenovo XClarity Administrator
- Update firmware from a repository
- License for XClarity Energy Manager

Note: The SR655 V3 does not support Power capping.

XCC2 Platinum also adds the following features that are new to XCC2:

- System Guard - Monitor hardware inventory for unexpected component changes, and simply log the event or prevent booting
- Enterprise Strict Security mode - Enforces CNSA 1.0 level security
- Neighbor Group - Enables administrators to manage and synchronize configurations and firmware level across multiple servers

Ordering information is listed in the following table. XCC2 Platinum is a software license upgrade - no additional hardware is required.

Table 75. XCC2 Platinum license upgrade

Part number	Feature code	Description
7S0X000KWW	SBCV	Lenovo XClarity Controller 2 (XCC2) Platinum Upgrade

With XCC2 Platinum, for CTO orders, you can request that System Guard be enabled in the factory and the first configuration snapshot be recorded. To add this to an order, select feature code listed in the following table. The selection is made in the Security tab of the DCSC configurator.

Table 76. Enable System Guard in the factory (CTO orders)

Feature code	Description
BUT2	Install System Guard

For more information about System Guard, see https://pubs.lenovo.com/xcc2/NN1ia_c_systemguard

Lenovo XClarity Provisioning Manager

Lenovo XClarity Provisioning Manager (LXPM) is a UEFI-based application embedded in ThinkSystem servers and accessible via the F1 key during system boot.

LXPM provides the following functions:

- Graphical UEFI Setup
- System inventory information and VPD update
- System firmware updates (UEFI and XCC)
- RAID setup wizard
- OS installation wizard (including unattended OS installation)
- Diagnostics functions

Lenovo XClarity Administrator

Lenovo XClarity Administrator is a centralized resource management solution designed to reduce complexity, speed response, and enhance the availability of Lenovo systems and solutions. It provides agent-free hardware management for ThinkSystem servers, in addition to ThinkServer, System x, and Flex System servers. The administration dashboard is based on HTML 5 and allows fast location of resources so tasks can be run quickly.

Because Lenovo XClarity Administrator does not require any agent software to be installed on the managed endpoints, there are no CPU cycles spent on agent execution, and no memory is used, which means that up to 1GB of RAM and 1 - 2% CPU usage is saved, compared to a typical managed system where an agent is required.

Lenovo XClarity Administrator is an optional software component for the SR655 V3. The software can be downloaded and used at no charge to discover and monitor the SR655 V3 and to manage firmware upgrades.

If software support is required for Lenovo XClarity Administrator, or premium features such as configuration management and operating system deployment are required, Lenovo XClarity Pro software subscription should be ordered. Lenovo XClarity Pro is licensed on a per managed system basis, that is, each managed Lenovo system requires a license.

The following table lists the Lenovo XClarity software license options.

Table 77. Lenovo XClarity Pro ordering information

Part number	Feature code	Description
00MT201	1339	Lenovo XClarity Pro, per Managed Endpoint w/1 Yr SW S&S
00MT202	1340	Lenovo XClarity Pro, per Managed Endpoint w/3 Yr SW S&S
00MT203	1341	Lenovo XClarity Pro, per Managed Endpoint w/5 Yr SW S&S
7S0X000HWW	SAYV	Lenovo XClarity Pro, per Managed Endpoint w/6 Yr SW S&S
7S0X000JWW	SAYW	Lenovo XClarity Pro, per Managed Endpoint w/7 Yr SW S&S

Lenovo XClarity Administrator offers the following standard features that are available at no charge:

- Auto-discovery and monitoring of Lenovo systems
- Firmware updates and compliance enforcement
- External alerts and notifications via SNMP traps, syslog remote logging, and e-mail
- Secure connections to managed endpoints
- NIST 800-131A or FIPS 140-2 compliant cryptographic standards between the management solution and managed endpoints
- Integration into existing higher-level management systems such as cloud automation and orchestration tools through REST APIs, providing extensive external visibility and control over hardware resources
- An intuitive, easy-to-use GUI
- Scripting with Windows PowerShell, providing command-line visibility and control over hardware resources

Lenovo XClarity Administrator offers the following premium features that require an optional Pro license:

- Pattern-based configuration management that allows to define configurations once and apply repeatedly without errors when deploying new servers or redeploying existing servers without disrupting the fabric
- Bare-metal deployment of operating systems and hypervisors to streamline infrastructure provisioning

For more information, refer to the Lenovo XClarity Administrator Product Guide:

<http://lenovopress.com/tips1200>

Lenovo XClarity Integrators

Lenovo also offers software plug-in modules, Lenovo XClarity Integrators, to manage physical infrastructure from leading external virtualization management software tools including those from Microsoft and VMware.

These integrators are offered at no charge, however if software support is required, a Lenovo XClarity Pro software subscription license should be ordered.

Lenovo XClarity Integrators offer the following additional features:

- Ability to discover, manage, and monitor Lenovo server hardware from VMware vCenter or Microsoft System Center
- Deployment of firmware updates and configuration patterns to Lenovo x86 [rack servers](#) and Flex System from the virtualization management tool
- Non-disruptive server maintenance in clustered environments that reduces workload downtime by dynamically migrating workloads from affected hosts during rolling server updates or reboots
- Greater service level uptime and assurance in clustered environments during unplanned hardware events by dynamically triggering workload migration from impacted hosts when impending hardware failures are predicted

For more information about all the available Lenovo XClarity Integrators, see the Lenovo XClarity Administrator Product Guide: <https://lenovopress.com/tips1200-lenovo-xclarity-administrator>

Lenovo XClarity Essentials

Lenovo offers the following XClarity Essentials software tools that can help you set up, use, and maintain the server at no additional cost:

- **Lenovo Essentials OneCLI**
OneCLI is a collection of server management tools that uses a command line interface program to manage firmware, hardware, and operating systems. It provides functions to collect full system health information (including health status), configure system settings, and update system firmware and drivers.
- **Lenovo Essentials UpdateXpress**
The UpdateXpress tool is a standalone GUI application for firmware and device driver updates that enables you to maintain your server firmware and device drivers up-to-date and help you avoid unnecessary server outages. The tool acquires and deploys individual updates and UpdateXpress System Packs (UXSPs) which are integration-tested bundles.
- **Lenovo Essentials Bootable Media Creator**
The Bootable Media Creator (BOMC) tool is used to create bootable media for offline firmware update.

For more information and downloads, visit the Lenovo XClarity Essentials web page: <http://support.lenovo.com/us/en/documents/LNVO-center>

Lenovo XClarity Energy Manager

Lenovo XClarity Energy Manager (LXEM) is a power and temperature management solution for data centers. It is an agent-free, web-based console that enables you to monitor and manage power consumption and temperature in your data center through the management console.

LXEM is a licensed product. A single-node LXEM license is included with the XClarity Controller Platinum upgrade as described in the [XCC2 Platinum](#) section. If your server does not have the XCC Platinum upgrade, Energy Manager licenses can be ordered as shown in the following table.

Table 78. Lenovo XClarity Energy Manager

Part number	Description
4L40E51621	Lenovo XClarity Energy Manager Node License (1 license needed per server)

Note: The SR655 V3 does not support the following Energy Manager functions:

- Power capping
- Policy-based management

For more information about XClarity Energy Manager, see the following resources:

- Lenovo Support page:
<https://datacentersupport.lenovo.com/us/en/solutions/Invo-lxem>
- User Guide for XClarity Energy Manager:
<https://pubs.lenovo.com/lxem/>

Lenovo Capacity Planner

Lenovo Capacity Planner is a power consumption evaluation tool that enhances data center planning by enabling IT administrators and pre-sales professionals to understand various power characteristics of racks, servers, and other devices. Capacity Planner can dynamically calculate the power consumption, current, British Thermal Unit (BTU), and volt-ampere (VA) rating at the rack level, improving the planning efficiency for large scale deployments.

For more information, refer to the Capacity Planner web page:
<http://datacentersupport.lenovo.com/us/en/solutions/Invo-lcp>

Security

Topics in this section:

- [Security features](#)
- [Platform Firmware Resiliency - Lenovo ThinkShield](#)
- [Security standards](#)

Security features

The SR655 V3 server offers the following electronic security features:

- Secure Boot function of the AMD EPYC processor
- Support for Platform Firmware Resiliency (PFR) hardware Root of Trust (RoT) - see the [Platform Firmware Resiliency](#) section
- Firmware signature processes compliant with FIPS and NIST requirements
- System Guard (part of [XCC Platinum](#)) - Proactive monitoring of hardware inventory for unexpected component changes
- Administrator and power-on password
- Integrated Trusted Platform Module (TPM) supporting TPM 2.0
- Self-encrypting drives (SEDs) with support for enterprise key managers - see the [SED encryption key management](#) section

The server is NIST SP 800-147B compliant.

The SR655 V3 server also offers the following physical security features:

- Optional chassis intrusion switch
- Optional lockable front security bezel

The optional lockable front security bezel is shown in the following figure and includes a key that enables you to secure the bezel over the drives and system controls thereby reducing the chance of unauthorized or accidental access to the server.

Front PCIe slots: The use of the security bezel is not supported when the server has front PCIe slots.

Figure 25. Lockable front security bezel

The dimensions of the security bezel are:

- Width: 437 mm (17.2 in.)
- Height: 87 mm (3.4 in.)
- Width: 23 mm (0.9 in.)

The following table lists the security options for the SR655 V3.

Table 79. Security features

Part number	Feature code	Description
4X97A82927	BAJJ	ThinkSystem SR650 V3/SR655 V3 Intrusion Cable
4XH7A09886	B8M2	ThinkSystem V2 2U Security Bezel Option Kit
4XH7A90300	BXBQ	ThinkSystem V3 2U Security Bezel Option Kit

Tip: The only difference between security bezels 4XH7A09886 and 4XH7A90300 is the Lenovo logo: On 4XH7A09886, the logo is made from plastic; on 4XH7A90300, the logo is made from aluminum alloy.

Platform Firmware Resiliency - Lenovo ThinkShield

Lenovo's ThinkShield Security is a transparent and comprehensive approach to security that extends to all dimensions of our data center products: from development, to supply chain, and through the entire product lifecycle.

The ThinkSystem SR655 V3 includes Platform Firmware Resiliency (PFR) hardware Root of Trust (RoT) which enables the system to be NIST SP800-193 compliant. This offering further enhances key platform subsystem protections against unauthorized firmware updates and corruption, to restore firmware to an integral state, and to closely monitor firmware for possible compromise from cyber-attacks.

PFR operates upon the following server components:

- UEFI image – the low-level server firmware that connects the operating system to the server hardware
- XCC image – the management “engine” software that controls and reports on the server status separate from the server operating system
- FPGA image – the code that runs the server’s lowest level hardware controller on the motherboard

The Lenovo Platform Root of Trust Hardware performs the following three main functions:

- Detection – Measures the firmware and updates for authenticity
- Recovery – Recovers a corrupted image to a known-safe image
- Protection – Monitors the system to ensure the known-good firmware is not maliciously written

These enhanced protection capabilities are implemented using a dedicated, discrete security processor whose implementation has been rigorously validated by leading third-party security firms. Security evaluation results and design details are available for customer review – providing unprecedented transparency and assurance.

The SR655 V3 includes support for Secure Boot, a UEFI firmware security feature developed by the UEFI Consortium that ensures only immutable and signed software are loaded during the boot time. The use of Secure Boot helps prevent malicious code from being loaded and helps prevent attacks, such as the installation of rootkits. Lenovo offers the capability to enable secure boot in the factory, to ensure end-to-end protection. Alternatively, Secure Boot can be left disabled in the factory, allowing the customer to enable it themselves at a later point, if desired.

The following table lists the relevant feature code(s).

Table 80. Secure Boot options

Part number	Feature code	Description	Purpose
CTO only	BPKQ	TPM 2.0 with Secure Boot	Configure the system in the factory with Secure Boot enabled.
CTO only	BPKR	TPM 2.0	Configure the system without Secure Boot enabled. Customers can enable Secure Boot later if desired.

Tip: If Secure Boot is not enabled in the factory, it can be enabled later by the customer. However once Secure Boot is enabled, it cannot be disabled.

Security standards

The SR655 V3 supports the following security standards and capabilities:

- **Industry Standard Security Capabilities**

- AMD CPU Enablement
 - AES-NI (Advanced Encryption Standard New Instructions)
 - GMET (Guest Mode Execute Trap)
 - Hardware-based side channel attack resilience enhancements
 - NX (No eXecute)
 - PSB (Platform Secure Boot)
 - Shadow Stack
 - SEV (Secure Encrypted Virtualization)
 - SEV-ES (Encrypted State register encryption)
 - SEV-SNP (Secure Nested Paging)
 - SVM (Secure Virtual Machine)
 - SME (Secure Memory Encryption)
 - UMIP (User Mode Instruction Prevention)
- Microsoft Windows Security Enablement
 - Credential Guard
 - Device Guard
 - Host Guardian Service
- TCG (Trusted Computing Group) TPM (Trusted Platform Module) 2.0
- UEFI (Unified Extensible Firmware Interface) Forum Secure Boot

- **Hardware Root of Trust and Security**

- Independent security subsystem providing platform-wide NIST SP800-193 compliant Platform Firmware Resilience (PFR)
- Host domain RoT supplemented by AMD Platform Secure Boot (PSB)
- Management domain RoT supplemented by the Secure Boot features of XCC

- **Platform Security**

- Boot and run-time firmware integrity monitoring with rollback to known-good firmware (e.g., "self-

healing”)

- Non-volatile storage bus security monitoring and filtering
- Resilient firmware implementation, such as to detect and defeat unauthorized flash writes or SMM (System Management Mode) memory incursions
- Patented IPMI KCS channel privileged access authorization (USPTO Patent# 11,256,810)
- Host and management domain authorization, including integration with CyberArk for enterprise password management
- KMIP (Key Management Interoperability Protocol) compliant, including support for IBM SKLM and Thales KeySecure
- Reduced “out of box” attack surface
- Configurable network services
- FIPS 140-3 (in progress) validated cryptography for XCC
- CNSA Suite 1.0 Quantum-resistant cryptography for XCC
- Lenovo System Guard

For more information on platform security, see the paper “How to Harden the Security of your ThinkSystem Server and Management Applications” available from <https://lenovopress.com/lp1260-how-to-harden-the-security-of-your-thinksystem-server>.

- **Standards Compliance and/or Support**

- NIST SP800-131A rev 2 “Transitioning the Use of Cryptographic Algorithms and Key Lengths”
- NIST SP800-147B “BIOS Protection Guidelines for Servers”
- NIST SP800-193 “Platform Firmware Resiliency Guidelines”
- ISO/IEC 11889 “Trusted Platform Module Library”
- Common Criteria TCG Protection Profile for “PC Client Specific TPM 2.0”
- European Union Commission Regulation 2019/424 (“ErP Lot 9”) “Ecodesign Requirements for Servers and Data Storage Products” Secure Data Deletion
- Optional FIPS 140-2 validated Self-Encrypting Disks (SEDs) with external KMIP-based key management

- **Product and Supply Chain Security**

- Suppliers validated through Lenovo’s Trusted Supplier Program
- Developed in accordance with Lenovo’s Secure Development Lifecycle (LSDL)
- Continuous firmware security validation through automated testing, including static code analysis, dynamic network and web vulnerability testing, software composition analysis, and subsystem-specific testing, such as UEFI security configuration validation
- Ongoing security reviews by US-based security experts, with attestation letters available from our third-party security partners
- Digitally signed firmware, stored and built on US-based infrastructure and signed on US-based Hardware Security Modules (HSMs)
- TAA (Trade Agreements Act) compliant manufacturing, by default in Mexico for North American markets with additional US and EU manufacturing options
- US 2019 NDAA (National Defense Authorization Act) Section 889 compliant

Rack installation

The following table lists the rack installation options that are available for the SR655 V3.

Table 81. Rack installation options

Part number	Feature	Description
Rail Kits		
4XF7A99129	C4TL	ThinkSystem Toolless Stab-in Slide Rail Kit V3
4XF7A99131	C4TN	ThinkSystem Toolless Stab-in Slide Rail Kit V3 with 2U CMA
4M17A13564	BK7W	ThinkSystem Toolless Friction Rail v2
4M17A11754	B8LA	ThinkSystem Toolless Slide Rail Kit v2
4M17A11756	B91Y	ThinkSystem Toolless Slide Rail Kit v2 with 2U CMA
Enhanced Rail Kits for > 34 kg server weight*		
4M17A11755	B8LB	ThinkSystem Toolless Slide Rail Kit v2 Enhanced
4M17A11757	B97N	ThinkSystem Toolless Slide Rail Kit v2 Enhanced with 2U CMA
Separate Cable Management Arm		
7M27A05698	B135	ThinkSystem 2U CMA Upgrade Kit for Toolless Slide Rail

* The Enhanced Slide Rail Kits are used when the server is shipped in a rack and the server is 34 kg or heavier (configuration with 20x 3.5-inch HDDs for example)

For the specification of the rail kits, see the ThinkSystem and ThinkEdge Rail Kit Reference: <https://lenovopress.lenovo.com/lp1838-thinksystem-and-thinkedge-rail-kit-reference#sr655-v3-support=SR655%2520V3>

Operating system support

The SR655 V3 with 5th Gen AMD EPYC processors supports the following operating systems:

- Microsoft Windows Server 2019
- Microsoft Windows Server 2022
- Red Hat Enterprise Linux 8.10
- Red Hat Enterprise Linux 9.4
- SUSE Linux Enterprise Server 15 SP6
- Ubuntu 24.04 LTS 64-bit
- VMware ESXi 8.0 U3
- Windows 10 (x64)
- Windows 11

The SR655 V3 with 4th Gen AMD EPYC processors supports the following operating systems:

- Microsoft Windows Server 2019
- Microsoft Windows Server 2022
- Red Hat Enterprise Linux 8.6
- Red Hat Enterprise Linux 8.7
- Red Hat Enterprise Linux 8.8
- Red Hat Enterprise Linux 8.9
- Red Hat Enterprise Linux 8.10
- Red Hat Enterprise Linux 9.0
- Red Hat Enterprise Linux 9.1
- Red Hat Enterprise Linux 9.2
- Red Hat Enterprise Linux 9.3
- Red Hat Enterprise Linux 9.4
- SUSE Linux Enterprise Server 15 SP4
- SUSE Linux Enterprise Server 15 SP5

- SUSE Linux Enterprise Server 15 SP6
- SUSE Linux Enterprise Server 15 Xen SP4
- SUSE Linux Enterprise Server 15 Xen SP5
- Ubuntu 20.04 LTS 64-bit
- Ubuntu 22.04 LTS 64-bit
- Ubuntu 24.04 LTS 64-bit
- VMware ESXi 7.0 U3
- VMware ESXi 8.0
- VMware ESXi 8.0 U1
- VMware ESXi 8.0 U2
- VMware ESXi 8.0 U3
- Windows 10 (x64)
- Windows 11

For a complete list of supported, certified and tested operating systems, plus additional details and links to relevant web sites, see the Operating System Interoperability Guide:

- 5th Gen AMD EPYC: <https://lenovopress.lenovo.com/osig#servers=sr655-v3-5th-gen-epyc-7d9f-7d9e&support=all>
- 4th Gen AMD EPYC: <https://lenovopress.lenovo.com/osig#servers=sr655-v3-4th-gen-epyc-7d9f-7d9e&support=all>

For configure-to-order configurations, the server can be preloaded with VMware ESXi installed on M.2 cards. Ordering information is listed in the following table.

Table 82. VMware ESXi preload

Part number	Feature code	Description
CTO only	BMEY	VMware ESXi 7.0 U3 (Factory Installed)
CTO only	BMT5	VMware ESXi 8.0 (Factory Installed)
CTO only	BQ8S	VMware ESXi 8.0 U1 (Factory Installed)
CTO only	BYC7	VMware ESXi 8.0 U2 (Factory Installed)
CTO only	BZ97	VMware ESXi 8.0 U3 (Factory Installed)

Configuration rule:

- An ESXi preload cannot be selected if the configuration includes an NVIDIA GPU (ESXi preload cannot include the NVIDIA driver)

You can download supported VMware vSphere hypervisor images from the following web page and load it on the M.2 drives or 7mm drives using the instructions provided:

https://vmware.lenovo.com/content/custom_iso/

Windows 10 and Windows 11

The SR655 V3 can now run Windows 10 and Windows 11, however only a subset of adapters and drives can be installed. For ease of configuration, additional Base CTO models 7D9ECTO2WW and 7D9FCTO2WW have been created to assist building a configuration that can be used with the client operating systems. See the [Models](#) section for details.

The XClarity management toolset is supported with Windows 10 and Windows 11.

Windows client license: A Windows client license for the system cannot be ordered from Lenovo nor can the OS be preloaded on the system in the factory. For the Windows license and for preloads, please contact your Lenovo business partner. A Windows Pro license is required as a qualifying base OS license in order to use a client Volume License offering.

See the part number tables in the following sections to see which adapters are supported with Windows 10 and Windows 11:

- [Controllers for internal storage](#)
- [M.2 adapters](#)
- [Network adapters](#)
- [GPU adapters](#)

GPU recommended: Lenovo recommends that if you plan to install Windows 10 or 11 on this server to run graphics-intensive applications, then you should selected a dedicated graphics adapter (GPU).

The following components are not supported:

- Fibre Channel adapters
- InfiniBand and VPI adapters
- External storage adapters
- Flash storage adapters

Physical and electrical specifications

The SR655 V3 has the following overall physical dimensions, excluding components that extend outside the standard chassis, such as EIA flanges, front security bezel (if any), and power supply handles:

- Width: 445 mm (17.5 inches)
- Height: 87 mm (3.4 inches)
- Depth: 766 mm (30.1 inches)

The following table lists the detailed dimensions. See the figure below for the definition of each dimension.

Table 83. Detailed dimensions

Dimension	Description
482 mm	X_a = Width, to the outsides of the front EIA flanges
435 mm	X_b = Width, to the rack rail mating surfaces
445 mm	X_c = Width, to the outer most chassis body feature
87 mm	Y_a = Height, from the bottom of chassis to the top of the chassis
698 mm	Z_a = Depth, from the rack flange mating surface to the rearmost I/O port surface
732 mm	Z_b = Depth, from the rack flange mating surface to the rearmost feature of the chassis body
727 mm (≤1100W) 755 mm (1800W) 781 mm (2400W)	Z_c = Depth, from the rack flange mating surface to the rearmost feature such as power supply handle
34 mm	Z_d = Depth, from the forwardmost feature on front of EIA flange to the rack flange mating surface
46 mm	Z_e = Depth, from the front of security bezel (if applicable) or forwardmost feature to the rack flange mating surface

Figure 26. Server dimensions

The shipping (cardboard packaging) dimensions of the SR655 V3 are as follows:

- Width: 592 mm (23.3 inches)
- Height: 282 mm (11.1 inches)
- Depth: 992 mm (39.1 inches)

The server has the following weight:

- Maximum weight: 38.8 kg (85.5 lb)

Electrical specifications for AC input power supplies:

- Input voltage:
 - 100 to 127 (nominal) Vac, 50 Hz or 60 Hz
 - 200 to 240 (nominal) Vac, 50 Hz or 60 Hz
 - 180 to 300 Vdc (China only)
- Inlet current: See the following table.

Table 84. Maximum inlet current

Part number	Description	100V AC	200V AC	220V AC	240V DC
AC input power - 80 PLUS Titanium efficiency					
4P57A82019	ThinkSystem 750W 230V Titanium Hot-Swap Gen2 Power Supply v3	No support	4A	3.6A	3.3A
4P57A72666	ThinkSystem 1100W 230V Titanium Hot-Swap Gen2 Power Supply	No support	5.9A	5.3A	5A
4P57A78359	ThinkSystem 1800W 230V Titanium Hot-Swap Gen2 Power Supply	No support	9.7A	8.7A	8.3A
4P57A72667	ThinkSystem 2600W 230V Titanium Hot-Swap Gen2 Power Supply v4	No support	13.2A	13A	11.9A
AC input power - 80 PLUS Platinum efficiency					
4P57A72670	ThinkSystem 750W 230V/115V Platinum Hot-Swap Gen2 Power Supply v3	8.4A	4.1A	3.69A	3.5A
4P57A72671	ThinkSystem 1100W 230V/115V Platinum Hot-Swap Gen2 Power Supply v3	12A	6A	5.4A	5.1A
4P57A26294	ThinkSystem 1800W 230V Platinum Hot-Swap Gen2 Power Supply v2	No support	10A	9.1A	9A
4P57A26295	ThinkSystem 2400W 230V Platinum Hot-Swap Gen2 Power Supply	No support	14A	12.6A	12A

Electrical specifications for DC input power supply:

- Input voltage: -48 to -60 Vdc
- Inlet current (1100W power supply): 26 A

Operating environment

The SR655 V3 server complies with ASHRAE Class A2 specifications with most configurations, and depending on the hardware configuration, also complies with ASHRAE Class A3 and Class A4 specifications.

Depending on the hardware configuration, the SR655 V3 server also complies with ASHRAE Class H1 specification. System performance may be impacted when operating temperature is outside ASHRAE H1 specification.

Topics in this section:

- [Ambient temperature requirements](#)
- [Temperature and humidity](#)
- [Heat output](#)
- [Acoustical noise emissions](#)
- [Shock and vibration](#)
- [Particulate contamination](#)

Ambient temperature requirements

The restrictions to ASHRAE support are as follows:

- The ambient temperature must be limited to 35 °C if the server has any of the following components:
 - Broadcom 57454 10GBASE-T 4-port OCP
 - Broadcom 57416 10GBASE-T 2-port OCP
 - PCIe network interface cards (NICs) at a rate greater than or equal to 100 GB
 - Parts with active optical cable (AOC) and at a rate of 25 GB

- The ambient temperature must be limited to 30 °C if the server has any of the following components:
 - 24 x 2.5" or 12 x 3.5" front bay, middle bay, or rear bay
 - GPU adapters
 - Parts with AOC and at a rate of greater than 25 GB
 - Group E (320W <= cTDP <= 400W) processors
 - 9754/9734/9654(P)/9554(P)/9174F processor in a front 8 x 2.5"/8 x 3.5"/16 x 2.5" standard configuration
- The ambient temperature must be limited to 25 °C if the server has any of the following components:
 - 9754/9734/9654(P)/9554(P)/9174F processor in a front 24 x 2.5"/12 x 3.5" configuration without middle/rear bay
 - 9754/9734/9654(P)/9554(P)/9174F processor in a front 8 x 2.5"/8 x 3.5"/16 x 2.5" + GPU configuration
 - Gen5 7.68 TB or larger capacity NVMe drives in a configuration with middle/rear bay
 - 24 x 2.5" front bay + GPU
 - Group A (240 W < cTDP ≤ 300 W) processor in a configuration with middle/rear bay

Server shutdown: When the ambient temperature is greater than the supported max temperature, the server will shut down (ASHRAE 45°C). The server will not power on again until the ambient temperature falls within the supported temperature range.

For additional information, see the Environmental specifications and Thermal rules sections in the product documentation:

https://pubs.lenovo.com/sr655-v3/server_specifications_environmental
https://pubs.lenovo.com/sr655-v3/thermal_rules

Temperature and humidity

The server is supported in the following environment:

- Air temperature:
 - Operating:
 - ASHRAE Class A2: 10°C to 35°C (50°F to 95°F); the maximum ambient temperature decreases by 1°C for every 300 m (984 ft) increase in altitude above 900 m (2,953 ft).
 - ASHRAE Class A3: 5°C to 40°C (41°F to 104°F); the maximum ambient temperature decreases by 1°C for every 175 m (574 ft) increase in altitude above 900 m (2,953 ft).
 - ASHRAE Class A4: 5°C to 45°C (41°F to 113°F); the maximum ambient temperature decreases by 1°C for every 125 m (410 ft) increase in altitude above 900 m (2,953 ft).
 - ASHRAE Class H1: 5 °C to 25 °C (41 °F to 77 °F); Decrease the maximum ambient temperature by 1°C for every 500 m (1640 ft) increase in altitude above 900 m (2,953 ft).
 - Server off: 5°C to 45°C (41°F to 113°F)
 - Shipment/storage: -40°C to 60°C (-40°F to 140°F)
- Maximum altitude: 3,050 m (10,000 ft)
- Relative Humidity (non-condensing):
 - Operating
 - ASHRAE Class A2: 8% to 80%; maximum dew point: 21°C (70°F)
 - ASHRAE Class A3: 8% to 85%; maximum dew point: 24°C (75°F)
 - ASHRAE Class A4: 8% to 90%; maximum dew point: 24°C (75°F)
 - ASHRAE Class H1: 8% to 80%; Maximum dew point: 17°C (63°F)
 - Shipment/storage: 8% to 90%

Heat output

The server generates the following heat:

- Heat/thermal output:
 - Minimum configuration: 2859 BTU/hr, 837 W
 - Maximum configuration: 11,665 BTU/hr, 3419 W

Acoustical noise emissions

The SR655 V3 has the following acoustic noise emissions declaration:

- Sound power level (L_{WAd}):
 - Idling: 6.6 Bel (Typical), 7.4 Bel (GPU rich), 7.4 Bel (Storage rich)
 - Operating: 8.1 Bel (Typical), 8.6 Bel (GPU rich), 7.5 Bel (Storage rich)
- Sound pressure level (L_{pAm}):
 - Idling: 49.9 dBA (Typical), 59.5 dBA (GPU rich), 59.5 dBA (Storage rich)
 - Operating: 65.4 dBA (Typical), 71.2 dBA (GPU rich), 61.3 dBA (Storage rich)

Notes:

- These sound levels were measured in controlled acoustical environments according to procedures specified by ISO7779 and are reported in accordance with ISO 9296.
- The declared acoustic sound levels are based on the following configurations, which may change depending on configuration/conditions :
 - Typical: 1x 300W CPU, 12x 64GB RDIMM, 16x 2.5 SAS HDD, RAID 940-8i, Intel E810-DA2 10/25GbE SFP28 2-Port OCP, 2x 1800W PSU
 - GPU rich: 1x 300W CPU, 3x A100-80G GPUs, 12x 64GB RDIMM, 16x 2.5 SAS HDD, RAID 940-16i, Intel E810-DA2 10/25GbE SFP28 2-Port OCP, 2x 2400W PSU
 - Storage rich: 1x 240W CPU, 12x 64GB RDIMM, 12x 3.5 SAS HDD, RAID 940-8i, Intel E810-DA2 10/25GbE SFP28 2-Port OCP, 2x 1800W PSU
- Government regulations (such as those prescribed by OSHA or European Community Directives) may govern noise level exposure in the workplace and may apply to you and your server installation. The actual sound pressure levels in your installation depend upon a variety of factors, including the number of racks in the installation; the size, materials, and configuration of the room; the noise levels from other equipment; the room ambient temperature, and employee's location in relation to the equipment. Further, compliance with such government regulations depends on a variety of additional factors, including the duration of employees' exposure and whether employees wear hearing protection. Lenovo recommends that you consult with qualified experts in this field to determine whether you are in compliance with the applicable regulations.

Shock and vibration

The server has the following vibration and shock limits:

- Vibration:
 - Operating: 0.21 G rms at 5 Hz to 500 Hz for 15 minutes across 3 axes
 - Non-operating: 1.04 G rms at 2 Hz to 200 Hz for 15 minutes across 6 surfaces
- Shock:
 - Operating: 15 G for 3 milliseconds in each direction (positive and negative X, Y, and Z axes)
 - Non-operating:
 - 23 kg - 31 kg: 35 G for 152 in./sec velocity change across 6 surfaces (3x GPU config, 2.5" config)
 - 32 kg - 68 kg: 35 G for 136 in./sec velocity change across 6 surfaces (20x 3.5" HDD config)

Particulate contamination

Airborne particulates (including metal flakes or particles) and reactive gases acting alone or in combination with other environmental factors such as humidity or temperature might damage the system that might cause the system to malfunction or stop working altogether.

The following specifications indicate the limits of particulates that the system can tolerate:

- Reactive gases:
 - The copper reactivity level shall be less than 200 Angstroms per month (Å/month)
 - The silver reactivity level shall be less than 200 Å/month
- Airborne particulates:
 - The room air should be continuously filtered with MERV 8 filters.
 - Air entering a data center should be filtered with MERV 11 or preferably MERV 13 filters.
 - The deliquescent relative humidity of the particulate contamination should be more than 60% RH
 - Environment must be free of zinc whiskers

For additional information, see the Specifications section of the documentation for the server, available from the Lenovo Documents site, <https://pubs.lenovo.com/>

Water infrastructure for the Lenovo Neptune Processor DWC Module

The Lenovo Processor Neptune Core Module is the liquid-based processor cooling offering for the SR655 V3, as described in the [Lenovo Processor Neptune Core Module](#) section.

The open-loop cooling module requires the following water infrastructure components in the rack cabinet and data center:

- Supported 42U or 48U rack cabinet

The 42U or 48U Heavy Duty Rack Cabinet (machine types 7D6D or 7D6E) are supported. Two 0U mounting points are required for the water manifolds, at the rear of the rack cabinet, one either side.

For information about the 42U and 48U Heavy Duty Rack Cabinets, see the product guide: <https://lenovopress.lenovo.com/lp1498-lenovo-heavy-duty-rack-cabinets>

- 38-port water manifold (machine type 7DE6), installed in the rear of the rack cabinet

The manifold provides quick-disconnect couplings that each server in the rack are connected to. Ordering information is in the table below.

- Coolant distribution unit (CDU), either in-rack or in-row

In-rack CDUs are installed at the bottom of the rack cabinet. The supported in-rack CDU is as follows:

- Lenovo Neptune DWC RM100 In-Rack CDU; see the [RM100 In-Rack Coolant Distribution Unit](#) section

In-row CDUs are separate cabinets that are typically installed at the end of a row of rack cabinets. Examples of suitable in-row CDUs include (but not limited to):

- CoolTera FS400 310KW CDU
- Vertiv Liebert XDU60 60KW CDU

- Hose kit to connect to the CDU to the manifold

Ordering information is in the table.

The following figure shows the major components of the solution.

Figure 27. Water manifold connections

Configuration requirements:

- Maximum number of SR655 V3 servers support in a rack:
 - 48U rack: 19 servers
 - 42U rack with in-rack CDU: 18 servers
 - 42U rack without in-rack CDU: 19 servers
- Inlet water flow rate:
 - 0.5 LPM: Maximum 40°C inlet water temperature
 - 1.0 LPM: Maximum 45°C inlet water temperature
 - 1.5 LPM: Maximum 50°C inlet water temperature
- Water pressure requirement:
 - Maximum operating node inlet pressure = 43.5 psi (3 Bar)

The 38-drop water manifold and hoses can be ordered as part numbers or by using the CTO process in the configurators using CTO model 7DE6CTO1WW. The following table lists the ordering information for the water manifold for the Processor Neptune Core Module.

Table 85. Ordering information

Part number	Feature code (7DE6CTO1WW)	Description
Manifold for 42U and 48U rack cabinet		
4XF7A90061	BXHD	ThinkSystem Neptune DWC 38 Port Rack Manifold
Hoses to connect the manifold to an in-rack CDU		
4XF7A90232	BXHE	Connection Set, for 38 Ports Manifold with in-Rack CDU in 42U Rack
4XF7A90233	BXHF	Connection Set, for 38 Ports Manifold with in-Rack CDU in 48U Rack
Hoses to connect the manifold to an in-row CDU		
4XF7A90234	BXHG	Hose Set, 1 inch EPDM, 1.3m, for 38 Ports manifold for in-row CDU
4XF7A90235	BXHH	Hose Set, 1 inch EPDM, 2.3m, for 38 Ports manifold for in-row CDU

Configuration notes:

- This water connection solution described here cannot be used with the DW612S enclosure as the water requirements are different.
- The hoses for in-row CDUs that are listed in the table above have Eaton FD83 quick-disconnect couplings

RM100 In-Rack Coolant Distribution Unit

The RM100 In-Rack Coolant Distribution Unit (CDU) can provide 100kW cooling capacity within the rack cabinet. It is designed as a 4U high rack device installed at the bottom of the rack. The CDU is supported in the 42U and 48U Heavy Duty Rack Cabinets.

For information about the 42U and 48U Heavy Duty Rack Cabinets, see the product guide: <https://lenovopress.lenovo.com/lp1498-lenovo-heavy-duty-rack-cabinets>

The following figure shows the RM100 CDU.

Figure 28. RM100 In-Rack Coolant Distribution Unit

The CDU can be ordered using the CTO process in the configurators using machine type 7DBL. The following table lists the base CTO model and base feature code.

Table 86. Ordering information

CTO model	Base feature	Description
7DBLCTOLWW	BRL4	Lenovo Neptune DWC RM100 In-Rack CDU

For details and exact specification of the CDU, see the In-Rack CDU Operation & Maintenance Guide: https://pubs.lenovo.com/hdc_rackcabinet/rm100_user_guide.pdf

Professional Services: The factory integration of the In-Rack CDU requires Lenovo Professional Services review and approval for warranty and associated extended services. Before ordering CDU and manifold, contact the Lenovo Professional Services team (CDUsupport@lenovo.com).

Warranty upgrades and post-warranty support

The SR655 V3 has a 1-year or 3-year warranty based on the machine type of the system:

- 7D9F - 1 year warranty
- 7D9E - 3 year warranty

Our global network of regional support centers offers consistent, local-language support enabling you to vary response times and level of service to match the criticality of your support needs:

- **Standard Next Business Day** – Best choice for non-essential systems requiring simple maintenance.
- **Premier Next Business Day** – Best choice for essential systems requiring technical expertise from senior-level Lenovo engineers.
- **Premier 24x7 4-Hour Response** – Best choice for systems where maximum uptime is critical.
- **Premier Enhanced Storage Support 24x7 4-Hour Response** – Best choice for storage systems where maximum uptime is critical.

For more information, consult the brochure [Lenovo Operational Support Services for Data Centers Services](#).

Services

Lenovo Data Center Services empower you at every stage of your IT lifecycle. From expert advisory and strategic planning to seamless deployment and ongoing support, we ensure your infrastructure is built for success. Our comprehensive services accelerate time to value, minimize downtime, and free your IT staff to focus on driving innovation and business growth.

Note: Some service options may not be available in all markets or regions. For more information, go to <https://lenovocator.com/>. For information about Lenovo service upgrade offerings that are available in your region, contact your local Lenovo sales representative or business partner.

In this section:

- [Lenovo Advisory Services](#)
- [Lenovo Plan & Design Services](#)
- [Lenovo Deployment, Migration, and Configuration Services](#)
- [Lenovo Support Services](#)
- [Lenovo Managed Services](#)
- [Lenovo Sustainability Services](#)

Lenovo Advisory Services

Lenovo Advisory Services simplify the planning process, enabling customers to build future-proofed strategies in as little as six weeks. Consultants provide guidance on projects including VM migration, storage, backup and recovery, and cost management to accelerate time to value, improve cost efficiency, and build a flexibly scalable foundation.

- **Assessment Services**

An Assessment helps solve your IT challenges through an onsite, multi-day session with a Lenovo technology expert. We perform a tools-based assessment which provides a comprehensive and thorough review of a company's environment and technology systems. In addition to the technology based functional requirements, the consultant also discusses and records the non-functional business requirements, challenges, and constraints. Assessments help organizations like yours, no matter how large or small, get a better return on your IT investment and overcome challenges in the ever-changing technology landscape.

- **Design Services**

Professional Services consultants perform infrastructure design and implementation planning to support your strategy. The high-level architectures provided by the assessment service are turned into low level designs and wiring diagrams, which are reviewed and approved prior to implementation. The implementation plan will demonstrate an outcome-based proposal to provide business capabilities through infrastructure with a risk-mitigated project plan.

Lenovo Plan & Design Services

Unlock faster time to market with our tailored, strategic design workshops to align solution approaches with your business goals and technical requirements. Leverage our deep solution expertise and end-to-end delivery partnership to meet your goals efficiently and effectively.

Lenovo Deployment, Migration, and Configuration Services

Optimize your IT operations by shifting labor-intensive functions to Lenovo's skilled technicians for seamless on-site or remote deployment, configuration, and migration. Enjoy peace of mind, faster time to value, and comprehensive knowledge sharing with your IT staff, backed by our best-practice methodology.

- **Deployment Services for Storage and ThinkAgile**

A comprehensive range of remote and onsite options tailored specifically for your business needs to ensure your storage and ThinkAgile hardware are fully operational from the start.

- **Hardware Installation Services**

A full-range, comprehensive setup for your hardware, including unpacking, inspecting, and positioning components to ensure your equipment is operational and error-free for the most seamless and efficient installation experience, so you can quickly benefit from your investments.

- **DM/DG File Migration Services**

Take the burden of file migration from your IT's shoulders. Our experts will align your requirements and business objectives to the migration plans while coordinating with your team to plan and safely execute the data migration to your storage platforms.

- **DM/DG/DE Health Check Services**

Our experts perform proactive checks of your Firmware and system health to ensure your machines are operating at peak and optimal efficiency to maximize up-time, avoid system failures, ensure the security of IT solutions and simplify maintenance.

- **Factory Integrated Services**

A suite of value-added offerings provided during the manufacturing phase of a server or storage system that reduces time to value. These services aim at improving your hardware deployment experience and enhance the quality of a standard configuration before it arrives at your facility.

Lenovo Support Services

In addition to response time options for hardware parts, repairs, and labor, Lenovo offers a wide array of additional support services to ensure your business is positioned for success and longevity. Our goal is to reduce your capital outlays, mitigate your IT risks, and accelerate your time to productivity.

- **Premier Support for Data Centers**

Your direct line to the solution that promises the best, most comprehensive level of support to help you fully unlock the potential of your data center.

- **Premier Enhanced Storage Support (PESS)**

Gain all the benefits of Premier Support for Data Centers, adding dedicated storage specialists and resources to elevate your storage support experience to the next level.

- **Committed Service Repair (CSR)**

Our commitment to ensuring the fastest, most seamless resolution times for mission-critical systems that require immediate attention to ensure minimal downtime and risk for your business. This service is only available for machines under the Premier 4-Hour Response SLA.

- **Multivendor Support Services (MVS)**

Your single point of accountability for resolution support across vast range of leading Server, Storage, and Networking OEMs, allowing you to manage all your supported infrastructure devices seamlessly from a single source.

- **Keep Your Drive (KYD)**

Protect sensitive data and maintain compliance with corporate retention and disposal policies to ensure your data is always under your control, regardless of the number of drives that are installed in your Lenovo server.

- **Technical Account Manager (TAM)**

Your single point of contact to expedite service requests, provide status updates, and furnish reports to track incidents over time, ensuring smooth operations and optimized performance as your business grows.

- **Enterprise Software Support (ESS)**

Gain comprehensive, single-source, and global support for a wide range of server operating systems and Microsoft server applications.

For more information, consult the brochure [Lenovo Operational Support Services for Data Centers](#).

Lenovo Managed Services

Achieve peak efficiency, high security, and minimal disruption with Lenovo's always-on Managed Services. Our real-time monitoring, 24x7 incident response, and problem resolution ensure your infrastructure operates seamlessly. With quarterly health checks for ongoing optimization and innovation, Lenovo's remote active monitoring boosts end-user experience and productivity by keeping your data center's hardware performing at its best.

Lenovo Managed Services provides continuous 24x7 remote monitoring (plus 24x7 call center availability) and proactive management of your data center using state-of-the-art tools, systems, and practices by a team of highly skilled and experienced Lenovo services professionals.

Quarterly reviews check error logs, verify firmware & OS device driver levels, and software as needed. We'll also maintain records of latest patches, critical updates, and firmware levels, to ensure you systems are providing business value through optimized performance.

Lenovo Sustainability Services

- **Asset Recovery Services**

Lenovo Asset Recovery Services (ARS) provides a secure, seamless solution for managing end-of-life IT assets, ensuring data is safely sanitized while contributing to a more circular IT lifecycle. By maximizing the reuse or responsible recycling of devices, ARS helps businesses meet sustainability goals while recovering potential value from their retired equipment. For more information, see the [Asset Recovery Services offering page](#).

- **CO2 Offset Services**

Lenovo's CO2 Offset Services offer a simple and transparent way for businesses to take tangible action on their IT footprint. By integrating CO2 offsets directly into device purchases, customers can easily support verified climate projects and track their contributions, making meaningful progress toward their sustainability goals without added complexity.

- **Lenovo Certified Refurbished**

Lenovo Certified Refurbished offers a cost-effective way to support IT circularity without compromising on quality and performance. Each device undergoes rigorous testing and certification, ensuring reliable performance and extending its lifecycle. With Lenovo's trusted certification, you gain peace of mind while making a more sustainable IT choice.

Lenovo TruScale

Lenovo TruScale XaaS is your set of flexible IT services that makes everything easier. Streamline IT procurement, simplify infrastructure and device management, and pay only for what you use – so your business is free to grow and go anywhere.

Lenovo TruScale is the unified solution that gives you simplified access to:

- The industry's broadest portfolio – from pocket to cloud – all delivered as a service
- A single-contract framework for full visibility and accountability
- The global scale to rapidly and securely build teams from anywhere
- Flexible fixed and metered pay-as-you-go models with minimal upfront cost
- The growth-driving combination of hardware, software, infrastructure, and solutions – all from one single provider with one point of accountability.

For information about Lenovo TruScale offerings that are available in your region, contact your local Lenovo sales representative or business partner.

Regulatory compliance

The SR655 V3 conforms to the following standards:

- ANSI/UL 62368-1
- IEC 62368-1 (CB Certificate and CB Test Report)
- CSA C22.2 No. 62368-1
- Mexico NOM-019
- India BIS 13252 (Part 1)
- Germany GS
- TUV-GS (EN62368-1, and EK1-ITB2000)
- Ukraine UkrCEPRO
- Morocco CMIM Certification (CM)
- Russia, Belorussia and Kazakhstan, TP EAC 037/2016 (for RoHS)
- Russia, Belorussia and Kazakhstan, EAC: TP TC 004/2011 (for Safety); TP TC 020/2011 (for EMC)
- CE, UKCA Mark (EN55032 Class A, EN62368-1, EN55024, EN55035, EN61000-3-2, EN61000-3-3, (EU) 2019/424, and EN IEC 63000 (RoHS))
- FCC - Verified to comply with Part 15 of the FCC Rules, Class A
- Canada ICES-003, issue 7, Class A
- CISPR 32, Class A, CISPR 35
- Korea KN32, Class A, KN35
- Japan VCCI, Class A

- China CECP certificate, CQC3135
- China CELP certificate, HJ 2507-2011

External drive enclosures

The server supports attachment to external drive enclosures using a RAID controller with external ports or a SAS host bus adapter. Adapters supported by the server are listed in the [SAS adapters for external storage](#) section.

Note: Information provided in this section is for ordering reference purposes only. For the operating system and adapter support details, refer to the interoperability matrix for a particular storage enclosure that can be found on the Lenovo Data Center Support web site:

<http://datacentersupport.lenovo.com>

Table 87. External drive enclosures

Model	Description
4587HC1	Lenovo Storage D1212 Disk Expansion Enclosure (2U enclosure with 12x LFF drive bays)
4587HC2	Lenovo Storage D1224 Disk Expansion Enclosure (2U enclosure with 24x SFF drive bays)
6413HC1	Lenovo Storage D3284 High Density Expansion Enclosure (5U enclosure with 84x LFF drive bays)
7DAHCTO1WW	Lenovo ThinkSystem D4390 Direct Attached Storage (4U enclosure with 90x LFF drive bays)

For details about supported drives, adapters, and cables, see the following Lenovo Press Product Guides:

- Lenovo Storage D1212 and D1224

Rack cabinets

The following table lists the supported rack cabinets.

Table 91. Rack cabinets

Model	Description
7D2NCTO1WW	12U 1200mm Deep Micro Datacenter Rack
93072RX	25U Standard Rack (1000mm)
93072PX	25U Static S2 Standard Rack (1000mm)
7D6DA007WW	ThinkSystem 42U Onyx Primary Heavy Duty Rack Cabinet (1200mm)
7D6DA008WW	ThinkSystem 42U Pearl Primary Heavy Duty Rack Cabinet (1200mm)
7D6EA009WW	ThinkSystem 48U Onyx Primary Heavy Duty Rack Cabinet (1200mm)
7D6EA00AWW	ThinkSystem 48U Pearl Primary Heavy Duty Rack Cabinet (1200mm)
1410O42	Lenovo EveryScale 42U Onyx Heavy Duty Rack Cabinet
1410P42	Lenovo EveryScale 42U Pearl Heavy Duty Rack Cabinet
1410O48	Lenovo EveryScale 48U Onyx Heavy Duty Rack Cabinet
1410P48	Lenovo EveryScale 48U Pearl Heavy Duty Rack Cabinet
93604PX	42U 1200mm Deep Dynamic Rack
93614PX	42U 1200mm Deep Static Rack
93634PX	42U 1100mm Dynamic Rack
93634EX	42U 1100mm Dynamic Expansion Rack
93074RX	42U Standard Rack (1000mm)

For specifications about these racks, see the Lenovo Rack Cabinet Reference, available from:
<https://lenovopress.com/lp1287-lenovo-rack-cabinet-reference>

Lenovo Financial Services

Why wait to obtain the technology you need now? No payments for 90 days and predictable, low monthly payments make it easy to budget for your Lenovo solution.

- **Flexible**

Our in-depth knowledge of the products, services and various market segments allows us to offer greater flexibility in structures, documentation and end of lease options.

- **100% Solution Financing**

Financing your entire solution including hardware, software, and services, ensures more predictability in your project planning with fixed, manageable payments and low monthly payments.

- **Device as a Service (DaaS)**

Leverage latest technology to advance your business. Customized solutions aligned to your needs. Flexibility to add equipment to support growth. Protect your technology with Lenovo's Premier Support service.

- **24/7 Asset management**

Manage your financed solutions with electronic access to your lease documents, payment histories, invoices and asset information.

- **Fair Market Value (FMV) and \$1 Purchase Option Leases**

Maximize your purchasing power with our lowest cost option. An FMV lease offers lower monthly payments than loans or lease-to-own financing. Think of an FMV lease as a rental. You have the flexibility at the end of the lease term to return the equipment, continue leasing it, or purchase it for the fair market value. In a \$1 Out Purchase Option lease, you own the equipment. It is a good option when you are confident you will use the equipment for an extended period beyond the finance term. Both lease types have merits depending on your needs. We can help you determine which option will best meet your technological and budgetary goals.

Ask your Lenovo Financial Services representative about this promotion and how to submit a credit application. For the majority of credit applicants, we have enough information to deliver an instant decision and send a notification within minutes.

Seller training courses

The following sales training courses are offered for employees and partners (login required). Courses are listed in date order.

1. **Family Portfolio: ThinkSystem Rackmount Servers powered by AMD**

2024-10-09 | 25 minutes | Employees and Partners

After completing this course, you will be able to identify products and features within the ThinkSystem AMD rack server family, describe unique innovations that this product family uses and recognize when a specific product should be selected.

Published: 2024-10-09

Length: 25 minutes

Start the training:

Employee link: Grow@Lenovo

Partner link: [Lenovo Partner Learning](#)

Course code: SXXW1216r9

2. **Q3 Solutions Launch AMD EPYC Gen5 Quick Hit**

2024-10-09 | 6 minutes | Employees and Partners

Lenovo announces upgrades to a wide range of ThinkSystem V3 servers powered by AMD processors. Support for the AMD EPYC 9005 Series processors and faster DDR5 memory will enhance the performance and power efficiency of these servers as well as the ThinkAgile systems based on them

Published: 2024-10-09

Length: 6 minutes
